

# World Data Flat

## 980 yen / 24 hours

### Convenient to use overseas!

It is a relief to be able to check maps and information on restaurants when traveling overseas!

You can use your mobile phone in the same way as in Japan in over 150 countries and regions\* worldwide.

\*: The number of eligible countries and regions increased from October 11, 2017. For the latest information, please see the au homepage.

Also convenient on overseas business trips!

#### Service

This is an overseas data flat rate service that allows users to use data transmission with the same data flat rate service/price plan capacity that they use within Japan for 24 hours in eligible countries and regions if they pay the user fee★1. (Please read the back of this form for details on methods of use.)

#### Point 1

**Start use at your destination with one-touch operation**

Start use with one-touch operation of the application or a browser.

※Transmission fees will not be charged until you begin use by pressing Start Usage.

#### Point 2

**You can have peace of mind since the service automatically disconnects after 24 hours from the start of use. Use only when you need it.**

※Transmission fees will not be charged after the service is automatically disconnected.

#### Point 3

**You can use the same amount of data as within Japan★1**

You can use the amount of data stipulated in your data flat rate service/price plan within Japan overseas.

#### User fee

**980 yen / 24 hours**

❗ The amount of data used for the World Data Flat service is consumed from the monthly volume of data flat rate services/price plans such as "au Pitatto Plan," "au Flat Plan 20/30," "Data Flat 1 – 30," "Data Flat 1 (Cellphone) – 5 (Cellphone)," "LTE Flat" or from the amount of data purchased for data charging★1. ※Basic user fees, domestic data flat rate service fees, call fees, other option fees, universal service fees, etc. apply separately.

#### Conditions

**Subscription to data charging option (free of charge).** (It's possible to subscribe to data charging option from the World Data Flat application.)

※Customers using 4G LTE compatible devices can subscribe to data charge.

※Please check the au homepage for details on eligible data flat rate services/price plans.

**Please check the au homepage to see which countries and regions are eligible for use.**

【Data transmission】★1: If the monthly data capacity or data capacity is exceeded, maximum transmission and reception is set at 128 Kbps (best effort type service). In some cases, transmission speed may be limited due to the policy of the overseas service provider regardless of the content of your contract. ※This service covers emails from au cellphones (including tablets), use of browsers, etc. and tethering. It does not apply to audio calls, video telephone calls SMS (C-mail)/international SMS. 【If you are subscribed to data charge】"World Data Flat" will apply to all countries and regions eligible in the "World Data Flat" plan. 【If you are not subscribed to data charge, or if you are connected to a ship or aircraft carrier outside of the eligible countries and regions】"World Data Flat" will not apply and data transmission fees will be subject to "Overseas Double Flat" or pay-as-you-go. 【If you do not wish to use "World Data Flat"】You must apply for the "World Data Flat Refusal Option." In such cases, "Overseas Double Flat" will apply.

○Regardless of whether you have subscribed to a data flat rate service, if your data usage fee overseas is very high, the circuit may be temporarily suspended. ○At the discretion of the data provider at your destination, the cellphone business or region/city may change or you may not be able to use the service within the eligible area due to topographic or geographic conditions. ○If using data sharing, the flat fee will apply to the use of each individual smartphone and/or tablet. ○Fees equivalent to taxes will not be added to the user fees for each international service.

For details, ask a staff member at your local au store or visit the au homepage.

# How to Use the Service

## Application

### Setup in advance within Japan

#### ☒ First, download the World Data Flat application!

※Separate data transmission fees apply.

<For iPhone>

Search for  
"World Data Flat"  
in the App Store.

<For Android™>

Search for  
"World Data Flat"  
in the au Market.

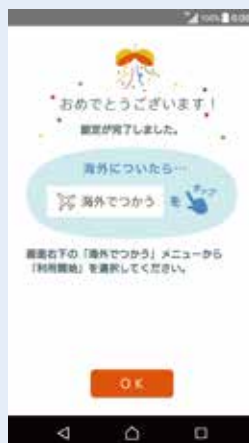

**⚠ In order to use this app overseas, we recommend you set it up in advance while still in Japan.**

After downloading the application, make sure to conduct initial setup within Japan.

Login with your au ID and complete the initial setup.

Once setup has been completed, you can use the service overseas.

※The types of models that can download the application are 4G LTE smartphones and 4G LTE tablets. (For some models, preparations are being made to offer the service.)

We recommend using the app!
