

# GRATINA

## Setting Guide

Thank you for buying the "GRATINA" (simply called the "product" from here on). This manual describes the settings and precautions for using the product. For explanations of basic functions, refer to "Basic Manual".

Company names and product names referred to in this manual are registered trademarks or trademarks of the respective companies. TM or ® may be omitted in this manual. The illustrations and screenshots in this manual may look different from the actual product or screens. Also, please note that the contents of the screen may be partially omitted. In this manual, "au Nano IC Card 04 LE" is abbreviated as "au IC card". In this manual, "microSD™ memory card (sold separately)" and "microSDHC™ memory card (sold separately)" are abbreviated as "microSD memory card" or "microSD".

April 2019, 1st Edition  
 Sold by: KDDI CORPORATION,  
 OKINAWA CELLULAR TELEPHONE COMPANY  
 Manufactured by: KYOCERA Corporation

### When Using the Product

Note the following when using the product.

- The battery isn't charged adequately at the time of purchase. Charge the battery sufficiently before use.
- To maintain water and dust resistance, attach the back cover firmly.
- If the confirmation screen such as terms and conditions, etc. appears when you use applications and functions of the product, follow the on-screen instructions.
- If the confirmation screen for communication charges appears when you use applications and functions of the product, follow the on-screen instructions.

### Initial Settings

At the first time of power-up, a screen for making initial settings is displayed, and you can set your au ID. "au ID" identifies the customer who uses au services. Register your au phone number as your au ID. By setting an au ID, you can use various services provided by au such as "au スマートパス (au Smart Pass)", "My au", and "au WALLET".

● From the standby screen, press [Settings] → [au ID Setting] to set.

- 
- 
- 

- 
- 
- 

- 

**To Enter Numbers (Switching Character Type)**  
 When a security code input screen such as ID confirmation, etc. appears, select the security code entry field and press [Char.] to change the character type to numbers.

Number input  
 Press [Char.] to switch the character type

### Switching to English Display

You can switch the display from Japanese to English.

- 
- 
- 

- 
- 

\* The message "起動中のアプリ、メール送受信、ダウンロードなどが終了される場合があります。変更しますか?" (Applications, mail transmission/reception, and downloads may be terminated. Change the language?) appears, confirm the content and then [はい (Yes)].

### Setting Wi-Fi®

You can use a household wireless LAN (Wi-Fi®) environment or a public wireless LAN environment when outside to connect to the Internet.

\* The battery is consumed faster when the wireless LAN (Wi-Fi®) function is ON. You are recommended to turn wireless LAN (Wi-Fi®) function OFF when not using wireless LAN (Wi-Fi®) function.

- 
- 
- 
- 

From the standby screen, press [Settings] → [Frequently used] → [Wi-Fi]

Available Wi-Fi® networks are listed.  
 • Select a Wi-Fi® network to connect → [Connect] to connect the Wi-Fi® network.  
 • If the Wi-Fi® network you want to connect is not detected, press [Menu] → [Add network] and connect to the Wi-Fi® network manually.

- 

\* To turn wireless LAN (Wi-Fi®) function ON, mark the checkbox.

### E-mail

To use e-mail (@au.com/@ezweb.ne.jp), subscription to LTE NET is required.

If you did not subscribe when you purchased the product, contact an au shop or Customer Service Center.

Your e-mail address is determined automatically after initial setting. You can change the e-mail address later.

### Initial Settings

- 
- 
- 

From the standby screen, press [E-mail settings] → [接続する (Connect)] → [閉じる (Close)]

You cannot make initial settings in Wi-Fi® communication only, and an error message is displayed. You can set Wi-Fi® settings to off in the following operations. From the standby screen, press [Settings] → [Frequently used] → [Wi-Fi] → Unmark "Wi-Fi".

### Checking E-mail Address

- 
- 
- 

From the standby screen, press [Menu] → [E-mail settings] → [E-mail information]

Your E-mail address is displayed.  
 \* From the standby screen, you can also check your E-mail address by pressing [Menu] → [E-mail address]

## Changing E-mail Address

- 

From the standby screen, press [Menu] → [E-mail settings]
- 

[Other settings]
- 

Confirm the contents → [接続する (Connect)] → [メールアドレスの変更へ (To change e-mail address)]
- 

Enter the security code\* → [送信 (Send)]
- 

Confirm the contents → [承諾する (Accept)]
- 

Mark the checkbox for "ご希望のメールアドレスに変更する (Change to your desired e-mail address)" → Enter an e-mail address → [送信 (Send)]
- 

[OK]
- 

[閉じる (Close)]

\* The security code is a 4-digit number set at subscription.

## +Message (SMS)

You can find many joys and conveniences in this messaging application. +Message can exchange messages, photos, and movies with a phone number. Not only au phone number destinations, but also available for sending messages to smartphone users.

- \* To use +Message, subscription to LTE NET is required.
- \* Data transfers of +Message service incur data communication charges. Subscription to a flat-rate service is recommended.
- \* If the other party does not use "+Message", you can only send messages as SMS. Communication charges are incurred at one time for use in sending SMS.
- \* You can also use the SMS (C-Mail) service you have used. If you want to use the SMS service you have used, select "only use SMS".

## Initial Settings

- 

From the standby screen, hold down [Menu] for at least 1 second
- 

[Next]
- 

Confirm the contents of 利用規約 (terms of use), press [承諾する (Accept)] → Follow the on-screen instructions
- 

In the above-mentioned step 3, press [OK] (only use SMS) → [OK] to use the SMS (C-Mail) service you have used.

+Message setting is complete

SMS mode screen

## How to Use +Message

You can check "Frequently asked questions" and "Use guide" using the browser.

- We recommend you to use other devices such as a PC or tablet when you watch the browser because this product's screen is small.

- 

From the standby screen, hold down [Menu] for at least 1 second\*
- 

[MyPage] → [How to use]
- 

[Frequently asked questions]/ [Use guide]

\* After the step 1, the message list screen may not be displayed depending on the closing operation of "+Message". When it happens, press [Menu] several times and return to the message list screen.

## Sending a Message

- 

From the standby screen, hold down [Menu] for at least 1 second
- 

[New message]
- 

Select a recipient → [Select]
- 

[Reply] → Enter text → [Done]
- 

[Send]

\* Press [File] or [Stickers] to send files or stickers.

## Checking a Received Message

- 

From the standby screen, hold down [Menu] for at least 1 second
- 

Select a sender → [Select]
- 

Displaying a received message

## How to Transfer Data

You can import/export data (phone book, photo, movie) from your old au phone to the product.

### Using the microSD Memory Card

- Save the data from the old au phone to the microSD memory card beforehand.
  - ① Insert the microSD memory card you used into the product.
  - ② You can transfer data from the data list screen in Data Folder.\*
- Example: Transferring the phone book in the microSD memory card to the product  
From the standby screen, press [Menu] → [Data Folder] → [PIM] → select the phone book → [Set] → select a data to register → [Done] → [Yes] → [OK]

### Using "Data Storage App"

- To import data using au server, store the data from the old au phone to au server beforehand. Setting au ID is required for using au server.
- To import data using a microSD memory card, save the data from the old au phone to the microSD memory card beforehand.

- 

From the standby screen, press [Security Safety]
- 

[Data Storage App]
- 

Select "データ移行 (Data transfer)" and transfer data according to the guidance on the screen

To use "Data Storage App" to back up the phone book to au server automatically, set as follows.  
From the standby screen, press [Menu] → [Security Safety] → [Data Storage App] → [データを保存/戻す (Save/Return data)] → [auサーバーを使う (Use au server)] → [アドレス帳の自動お預かり設定 (Contacts auto backup setting)]

### Using Bluetooth® Function

- You can transfer data using Bluetooth® functions.\*
- Example: Transferring the phone book to the product
- ① From the standby screen, press [Menu] → [Settings] → [Frequently used] → [Bluetooth] → mark the checkbox "Bluetooth" → [Menu] → [Receive Phonebook] → select a Bluetooth® device → [Yes] → [Connect]
    - The product will be paired with a Bluetooth® device and you can receive phone book data.
  - ② After receiving files, press [Menu] → [Show received files] → select a phone book → [Set] → select the data to register → [Done] → [Yes] → [OK]
- Connections between the product and all other Bluetooth® devices have not been confirmed. All connections with Bluetooth® devices cannot be guaranteed.

\* For details, refer to the "取扱説明書 詳細版 (Full Instruction Manual)" (Japanese). "取扱説明書 詳細版 (Full Instruction Manual)" (Japanese) is available on the au homepage. <https://www.au.com/support/service/mobile/guide/manual/>
