# au

Thank you for buying the "INFOBAR xv" (simply called the "product" from here on).
This manual describes the settings and precautions for using the product. For explanations of basic functions, refer to "Basic Manual".

15th Anniversary

# I N F O B A R xv

## Setting Guide

Company names and product names referred to in this manual are registered trademarks or trademarks of the respective companies. TM or ® may be omitted in this manual.
The illustrations and screenshots in this manual may look different from the actual product or screens. Also, please note that the contents of the screen may be partially omitted.
In this manual, "au Nano IC Card 04 LE" is abbreviated as "au IC card".
In this manual, "microSD™ memory card (sold separately)" and "microSDHC™ memory card (sold separately)" are abbreviated as "microSD memory card" or "microSD".

## When Using the Product

Note the following when using the product.
● The battery isn't charged adequately at the time of purchase. Charge the battery sufficiently before use.
● If the confirmation screen such as terms and conditions, etc. appears when you use applications and functions of the product, follow the on-screen instructions.
● If the confirmation screen for communication charges appears when you use applications and functions of the product, follow the on-screen instructions.

## Basic Operation

Basic key operations are described here.

### ■ Key Names and Functions

Names of keys on the product and their functions are described.

① ◉ Center key
Decides the menu or items to select.
In the standby screen, press to display the main menu. Holding down for at least 1 second in the standby screen disables the key operation.
② ✥ Cursor key
Moves the cursor up/down/left/right, or activates functions.
◁ Left key/incoming call history
▷ Right key/outgoing call history
△ Up key
Holding down for at least 1 second in the standby screen displays the Notification/Settings screen.
▽ Down key
Holding down for at least 1 second in the standby screen displays the recently used application list.
③ 📖 Phone book key
In the standby screen, press to activate the phone book menu. Holding down for at least 1 second in the standby screen displays the phone book edit screen.
④ ✉ Mail key
In the standby screen, press to activate E-mail. Holding down for at least 1 second in the standby screen activates +Message (SMS).
⑤ 📞 Call/Pair key
From the standby screen, press 📞 without entering a phone number to display the confirmation screen of pair registering. And register a person to pair to use the pair function.
Holding down for at least 1 second in the standby screen activates the fake incoming call function to use.

⑥ 0 - 9, ✳, # Number keys
Enters phone numbers or characters.
Holding down # for at least 1 second in the standby screen, enters/exits the manner mode.
Also, holding down 1 2 3 for at least 1 second activates application assigned to each Custom key.
⑦ clear Clear/Memo key
While using the product, return to the previous screen.
From the standby screen, press the key to display the answer memo list screen.
Holding down for at least 1 second in the standby screen sets/cancels the answer memo function.
⑧ 📷 Camera key
In the standby screen, press to activate the camera function. Holding down for at least 1 second in the standby screen displays the folder list of data folder.
⑨ 🌐 Browser key
In the standby screen, press to display browser menu. Holding down for at least 1 second in the standby screen displays the Application screen.
⑩ ⌁ Power/End call key
While using the product, end call or exit functions. Hold down to turn the product on or off.

### ■ Using Custom Keys

Hold down 1 2 3 📞 each to activate the following applications assigned at the time of purchase.
• Hold down 1: LINE
• Hold down 2: Remote Voice Assistant
• Hold down 3: Flashlight
• Hold down 📞: Fake call

You can change the key assignment at the following operations.
From the standby screen, press ◉ → [Settings] → [More settings] → [Custom key] → 1 2 3 to select the application, or switch to enable or disable "Fake call"

## Preparing the Product for Use

### ■ Inserting/Removing the microSD Memory Card

You can save/move/copy data by inserting a microSD memory card (including microSDHC memory card) in the product.
● Turn the power off beforehand.
● A microSD memory card initialized on another device may not work on the product properly. Format the microSD memory card on this product. Use the following steps.
From the standby screen, press ◉ → [Settings] → [More settings] → [Storage] → [Erase SD card] → [Erase SD card] → [Erase everything]
● Make sure that the top/bottom and front/rear of the microSD memory card are facing correctly. Trying to force a wrongly oriented card into the slot could make it impossible to remove the card or result in damage.
● Do not touch the terminal part of a microSD memory card.

### Inserting

1 Insert the tip of the SIM card removal tool (sample) into the hole of the au IC card/microSD memory card tray and slowly push it in the direction of the arrow.
The tray is ejected.

SIM card removal tool (sample)

2 Pull the tray out straight to remove it from the product.
3 Put the microSD memory card into the tray with the terminal (metal) part downwards, insert the tray into the product, and then push it all the way straight into the slot.
Insert the microSD memory card so that it is tightly attached to the tray.
Put a microSD memory card in the direction of the arrow. Do not damage the projection of the tray.

Projection

4 Insert the tray into the product, and then push it all the way straight into the slot.
5 Push the tray firmly and make sure that there is no gap between the tray and the product.

### Removing

1 Insert the tip of the SIM card removal tool (sample) into the hole of the au IC card/microSD memory card tray and slowly push it.
2 Pull the tray out straight to remove it from the product.
3 Remove the microSD memory card, insert the tray into the product, and then push it all the way straight into the slot.

4 Push the tray firmly and make sure that there is no gap between the tray and the product.

### ■ Charging

● While charging, the charging indicator illuminates in red. When charging is finished, the charging indicator goes out.
● The product may become warm while charging, depending on the situation, but this is not abnormal.
● When you operate the product with the specified charger (sold separately) connected, the product may repeat short-time charging/discharging resulting in short battery life.
● When the temperature of the environment or the product becomes extremely high or low, charging may be stopped. Try to charge the battery at room temperature as much as possible.
● If the charging indicator blinks in red, check if the phone is connected correctly, etc. If the indicator keeps blinking, stop charging and then contact an au shop or Repair and Delivery Support Center.

### Charging with a Specified AC Adapter (Sold Separately)

1 Check the orientation of the microUSB plug of Common AC Adapter 05 (sold separately) and insert it straight into the external connection terminal.

2 Insert the power plug of Common AC Adapter 05 (sold separately) into an outlet (100 to 240 VAC).

Charging indicator

With the projection facing down

Common AC Adapter 05 (sold separately)

Common AC Adapter 05 (sold separately)

### Charging with the Desktop Holder and a Specified AC Adapter (Sold Separately)

1 Insert the microUSB plug of Common AC Adapter 05 (sold separately) to the connection terminal of the desktop holder (KYX31PUA) included.
Check the orientation of the microUSB plug and insert it in the direction shown.

2 Insert the power plug of Common AC Adapter 05 (sold separately) into an outlet (100 to 240 VAC).

Connection terminal

With the projection facing down

Common AC Adapter 05 (sold separately)
Desktop holder (KYX31PUA)

Common AC Adapter 05 (sold separately)

3 Mount the product in the desktop holder (KYX31PUA).
Hold the USB plug of the desktop holder, insert it straight into the external connection terminal of the product.

Charging indicator

USB plug

• Take care about the product's key not to hook with the desktop holder and do not hit the product against the USB plug. It could result in the product and the desktop holder being damaged.

### Charging with a PC

1 Connect microUSB Cable 01 (sold separately) to a chargeable USB port of a PC after the PC is activated completely.

2 Check the orientation of the microUSB plug of microUSB Cable 01 (sold separately) and insert it straight into the external connection terminal.
• It may take longer for the battery to be fully charged than if you use the specified AC adapter (sold separately).
• If a screen for detecting a new hardware, etc. is displayed on the PC, select "Cancel".

## Initial Settings

At the first time of power-up, a screen for making initial settings is displayed, and you can set your au ID.
"au ID" identifies the customer who uses au services. Register your au phone number as your au ID. By setting an au ID, you can use various services provided by au such as "au スマートパス (au Smart Pass)", "My au", and "au WALLET".
● From the standby screen, press ◉ → [Settings] → [au ID Setting] to set.

1
