

- "Setting Guide", "Basic Manual", "Notes on Usage", etc. are collectively referred to as "Instruction Manual".
- In this manual, Isai FL (LGL24) is usually referred to as the "product".
- In this manual, "microSD™ memory card", "microSDHC™ memory card" and "microSDXC™ memory card" are abbreviated as "microSD memory card" or "microSD".

Exemptions

- The Company is not liable for any damages arising from earthquakes, lightning, storms, floods or other natural disasters, as well as fires, actions by third parties, other accidents, intentional or mistaken misoperation by the customer, or use under other unusual conditions outside the responsibility of the Company.
- The Company is not liable for any incidental damages (change/disappearance of described content, loss of business income, disruption of business, etc.) arising from use or inability to use the product.
- The Company is not liable for any damages arising from failure to observe the described content of the "Instruction Manual".
- The Company is not liable for any damages arising, for example, from malfunction caused by combination with connected devices or software not related to the Company.
- Captured image data or downloaded data may sometimes be altered or lost due to faults, repair or other handling of the product. The Company is not liable for any damage or lost income resulting from recovery of these data.
- It is recommended you keep a copy of important data on your PC's hard disk, etc. Whatever the cause of the defect or malfunction may be, the Company assumes no responsibility for alteration or loss of saved data.
- "The Company" as appears in this manual refers to the following companies: Sold by: KDDI CORPORATION, OKINAWA CELLULAR TELEPHONE COMPANY Imported by: LG Electronics Japan, Inc. Manufactured by: LG Electronics Inc.

memo

- Reproduction of the content of this manual in part or in whole is prohibited.
- The content of this manual is subject to change without notice.
- Every effort has been made in the preparation of this manual. Should you notice any unclear points, omissions, etc., feel free to contact us.

Safety Precautions (Observe Strictly)

Before using the product, thoroughly read these safety precautions for proper use. After reading, store the precautions in a safe place.

- These "Safety Precautions" describe instructions that should be observed to prevent damage to property or injury to the customer or others using the product.
- These instructions are divided into the following categories.

These instructions are divided into the following categories.

	This symbol indicates the potential and imminent danger of death or serious injury ¹⁾ to a person.
	This symbol indicates "the possibility of death or serious injury to a person".
	This symbol indicates the possibility of personal minor injury ²⁾ to a person or physical damage ³⁾ .

- Serious injury**¹⁾: This refers to loss of sight, injury, burns (high- and low-temperature), electric shock, broken bones, injuries with residual aftereffects from poisoning, etc., and injuries requiring hospital admission for treatment or long term hospital attendance as an outpatient.
- Minor injury**²⁾: This refers to injuries, burns (high- and low-temperature), electric shock, etc. that do not require hospital admission for treatment or long-term hospital attendance as an outpatient.
- Physical damage**³⁾: This refers to extended damage to buildings, furniture, livestock, or pets.

Explanation of graphic symbols used in this manual

	Indicates an action that is not allowed.		Indicates that use in a place where the product is likely to get wet or allowing the product to get wet is not allowed.
	Indicates that handling with wet hands is not allowed.		Indicates an action that must be done.
	Indicates that disassembly is not allowed.		Indicates that the power plug must be disconnected from the power outlet.

Precautions common to the main unit, built-in battery, charging equipment, au Nano IC Card (LTE), peripheral devices

Be sure to read the following hazards before use.

- Be sure to use only the specified peripheral devices. Use of other devices might cause overheating, ignition, rupture, fault, or leakage of liquid.
- Do not use, store or leave the product in hot places (e.g. by the fire, near a heater, under a kotatsu, in direct sunlight, in a car in the hot sun). Doing so might cause ignition, rupture, fault, fire or injury.
- Before entering an area where flammable gas is generated such as a gas station, be sure to turn off this product. Do not charge the battery. Failure to observe these precautions might cause the gas to catch fire. In addition, when using Osaifu-Keitai® at a gas station, be sure to turn off the power in advance. (If NFC/Osaifu-Keitai® lock has been set, cancel the lock before turning off the power.)
- Do not put the product in a cooking apparatus such as a microwave oven or a pressure vessel. Doing so might cause ignition, rupture, fault, fire or injury.
- Do not throw the product into a fire or heat it. Doing so might cause fire, rupture or fire.
- Do not short-circuit the connection terminal, earphone terminal, etc. Do not allow conductive foreign objects (metal fragments, pencil leads, etc.) to come into contact with or get inside the connection terminal, earphone terminal, etc. Doing so might cause a fire, burns, a fault due to heat generation.
- When using metal accessories, etc., make sure not to allow the metal part come in contact with the connection terminals, earphone terminal or power outlet. Doing so might cause electric shock, ignition, injury or a fault.
- Do not expose the camera lens to direct sunlight for an extended period. Doing so might cause ignition, rupture or fire by the light-collecting mechanism of the lens.
- The customer is not allowed to disassemble, modify or repair the product. Doing so might cause a fault, ignition, electric shock, or injury. The Company is not liable even in the event of any non-conformities arising on the product or peripheral devices as a result of modification, etc. Modification of the product is in violation of the Wireless Telegraphy Act.

Be sure to read the following warnings before use.

- Do not drop or subject to strong impact, such as throwing. Doing so might cause rupture, overheating, ignition, or a fault.
- Do not use outside when you can hear thunder. Doing so might risk lightning strikes and electric shock.
- Do not let your hands, fingers and other parts of the body touch the connection terminals. Doing so might cause electric shock, injury or a fault.
- If the product is damaged because it is dropped or something, and its display is cracked or internal parts are exposed, do not touch the cracked display or exposed parts with your hands. Doing so might cause electric shock or injury from damaged parts. Contact au shop or Keitai Guarantee Service Center.

- If the wet main unit is charged, electric shock, short circuit, or corrosion may occur and overheating may cause fire or malfunction or burns.

- Do not splash with water or other liquids. Also, never use in places subject to direct splashing with water or pet urine, etc. or in humid places such as bath areas, or use with wet hands. Doing so might cause electric shock, fault from short-circuiting, or corrosion of electronic circuits. In the event that the product is splashed with liquid, immediately disconnect the AC adapter's power plug. Faults caused by wetting with water or humidity are not covered by the warranty and charges will be incurred for repair.
- Although this product model has waterproof property, stop using it if liquid such as water gets inside the main unit from the back cover. Continued use of the product in this state might cause overheating, fire, or a fault.

- When removing the back cover, do not exert more than necessary force. Doing so might cause injury or a fault.
- Do not operate the product while driving a car or motorbike, riding a bicycle, or walking. Doing so may compromise traffic safety and cause an accident.
- If charging is not completed after the specified charging time, stop charging. Failure to do so might cause leakage of liquid, overheating, rupture or ignition.
- Do not leave in places within the reach of small children. Small children might swallow small parts, etc. by mistake and choke on them, or might drop them by mistake and cause accidents or injury.

Be sure to read the following cautions before use.

- Do not store the product in places subject to direct sunlight (e.g. in cars), places that get hot, places that get extremely cold, and in humid or dusty places. Doing so might cause overheating, fire, deformation or a fault.
- Do not leave on unstable places such as rocky stands or tilting surfaces. Dropping the product may cause injury or damage. Pay sufficient attention while vibrator is set to ON. Also, pay sufficient attention to impact, etc.
- Do not cover or wrap this product with bedding, etc. while using or charging the product. Doing so might cause fire, fault or injury.
- Do not touch the main unit of the product and the specified AC adapter (sold separately) for a long time while power is being supplied from an external source. Doing so might cause low-temperature burns.
- Be careful when using this product in a high temperature place for a long time. It might become hot. Use of it with your skin touching the product for a long time might cause low-temperature burns.
- Do not use power outlets or wiring apparatus beyond its rating. Also, exceeding rating, for example, by connecting multiple devices to a single power strip might cause overheating and fire.
- Do not use the product with the back cover removed.
- Do not place near corrosive chemicals or in places where corrosive gas is generated. Doing so might cause a fault or loss of internal data.
- Do not leave or store with the back cover removed from the main unit. Doing so might allow dust or other foreign objects to get inside and cause a fault.
- Do not use the product if there is smoke, abnormal odor or noise, excessive overheating, or other abnormalities. If an abnormality occurs, disconnect the specified charging equipment (sold separately) from the power outlet, make sure that the product is not overheating before turning the power off, and contact an au shop or Keitai Guarantee Service Center. Also, if you have dropped or damaged the product, do not continue to use it in that state, and contact an au shop or Keitai Guarantee Service Center.

- When inserting an earphone, etc. into the product, adjust the volume to the proper level. Setting too loud a volume or using the earphone continuously for a long period of time might adversely affect your ears. Also, raising the volume too high might prevent you from hearing sounds around you, which might in turn lead to a traffic accident at a railroad crossing or pedestrian crossing.

- When adjusting the volume with an earphone, etc. inserted into the product, raise the volume a little at a time. If you raise the volume too much from the outset, sudden loud noise from the earphone, etc. might adversely affect your ears.

- When using a charging equipment or external device, insert/remove the connector straight to/from the terminal. Unless it's correct, it may cause damage or a fault.

Main unit

Be sure to read the following hazards before use.

- Do not puncture the product with a nail, hit with a hammer or step on the product. Doing so might cause fire or damage.
- Do not disassemble, modify or directly solder the product. Doing so might cause spilling of the battery liquid resulting in an accident such as loss of eyesight if it gets into the eyes, or cause overheating, injure, fire or rupture.
- Be careful not to have the product bitten by your pet. It might cause liquid leakage, overheating, rupture, fire, injure or ignition of the internal battery.

Be sure to read the following warnings before use.

- Do not use a cell phone while driving a car or riding a motorbike or bicycle. It might cause a traffic accident. Use of a cell phone while driving a car or motorbike is prohibited by law. Use of a cell phone while riding a bicycle may be punishable by some regulations.
- Do not use the product while you are aboard an airplane. Use of electric devices transmitting radio waves in airplane is prohibited by law. Some airline companies, however, allow their passengers to use cell phones. For details, contact the airline company you use.
- This product sometimes affects high-precision electronic devices. So, turn it off near such devices. (Examples of electronic devices that might be affected by the product include cardiac pacemakers, hearing aids, other electronic medical devices, fire alarms, and automatic doors. If you are using an electronic medical device, contact the device manufacturer or retailer for information about the possible affect of radio waves.)

- When using the product near an implanted pacemaker, implanted cardioverter-defibrillator or other electronic medical device, radio waves might affect these units and devices. So, please observe the following.
 - Those with an implanted pacemaker or implanted cardioverter-defibrillator should carry or use the product at least 15 cm away from the pacemaker or cardioverter-defibrillator applied part.
 - Set the product to airplane mode or turn off the power in advance in places where you cannot move freely or where you cannot secure a distance of more than 15 cm with one another, since there may be people with a implanted cardiac pacemaker or implanted cardioverter-defibrillator nearby.
 - Pay attention to the following points when using the product inside medical institutions.

- Do not bring the product into operating theaters, intensive-care units (ICU) and coronary care units (CCU).
- Turn the product off in hospital wards.
- Even if you are in a lobby, etc., be sure to turn the product off when there are electronic medical devices nearby.
- When a medical institution has laid down designated areas where use of the product is prohibited or is not allowed to be brought in, abide by the instructions of that medical institution.
- When using electronic medical devices other than an implanted pacemaker and implanted cardioverter-defibrillator outside a medical institution (e.g. home medical treatment), check individually with the manufacturer of the electronic medical device regarding the influence of radio waves.

- Stay alert to your surroundings when calling, messaging, browsing the Internet, shooting photos, playing games, watching TV or listening to music. Failure to do so might cause a fall or traffic accident.
- Do not send data by infrared communication with the infrared port pointing toward eyes. Doing so might affect eyes. Also, sending data with the infrared port pointing toward some other infrared device might cause false operation, etc.
- When using the photo light, do not lighten in front of person's eye. Do not gaze at the light emitting part when the photo light is lighted. Doing so may cause impairment of eyesight, etc. Be especially careful not to take pictures of small children from a very close distance.

- Do not lighten the photo light toward a person who drives an automobile, motorized bicycle or a bicycle. If dazzled by the light, the driver might become unable to drive and cause an accident.

- Sometimes, very rarely some people demonstrate symptoms such as temporary muscle spasms, loss of consciousness, etc. by watching repeatedly flickering screens. Those with a past history of this should consult with a physician beforehand.

- If the fuse in the common DC adapter O3 (sold separately) blows, replace it with a fuse of the specified type (250 V, 1A). Replacing with a different type of fuse might cause overheating or fire. (For information about fuse replacement, carefully read the manual for the common DC adapter O3 (sold separately).)

- Do not use at other voltages than the specified power supply voltage. Doing so might cause ignition, fire, overheating, injure or electric shock.
 - AC adapter (sold separately): 100 VAC to 240 VAC
 - Common DC adapter O3 (sold separately) : 12/24 VDC (for negative grounded vehicles only)

Be sure to read the following cautions before use.

- Use of the main unit in an automobile sometimes affects on-vehicle electronic devices, though this rarely happens. If this happens, stop use since this may impair safe travel.
- If you feel any abnormality with your skin, immediately consult a dermatologist. Itching, rashes, eczema, etc. sometimes occurs depending on your physical constitution and condition.

The materials of parts used on the product are as follows.

Part	Material	Surface treatment
Outer case (display frame part)	PC resin	NCVM
Outer case (side)	PC resin	-

Part	Material	Surface treatment	
Exterior case (microSD memory card slot/periphery cover)	PC+TPE resin	-	
Back cover	Blue, Pink	PC resin	UV coating
	White	-	-
Volume key	Blue, Pink	PC+TPU resin	UV coating
	White	-	-
Power key	PC+TPU resin	NCVM	
Display	Hardened glass	Easy cleaning coating	
Earpiece	Stainless steel	PVD coating	
Lens for the camera	Soda-lime glass	AR, AF coating	
Camera lens decoration	AL	Anodic oxide	
Photo light, infrared port	PC resin	-	

- Do not bring the product close to magnetized objects such as cash cards, floppy disks, credit cards, and prepaid cards. Doing so might result in loss of recorded information.

- Do not allow liquids, metal objects, burnable items, and other foreign matter to get inside the microSD memory card slot or earphone terminal. Failure to do so might cause fire, electric shock, injure or a fault.

- Do not swing the product around by holding earphones. LG TV antenna cable O1, etc. Doing so might cause an accident or damage.

- Do not use it with microSD memory card slot cover closed. Doing so might result in malfunction due to dust and water getting in.

- Be careful when setting vibrator (vibration) or ringtone if you heart is weak. Doing so might result in bad effect to heart.

- Pay attention to items stuck to the main unit. The speaker uses magnets, and so thumbtacks and pins, craft knife blades, staples, and other metal objects sometimes become stuck to the main unit, and cause unexpected injury. Before using the product, be sure to check that there are no foreign objects on the speaker or other parts.

- Do not place the product directly on sand at a beach, etc. Sand or other small particles might get inside the earpiece (receiver), microphone (microphone), or speaker, causing the volume to drop. If sand gets inside main unit, it might cause overheating or a fault.

- When using the product for calling or data communication, be careful not to keep the product in direct contact with your skin for a prolonged period, or not to cover the product with paper, cloth, bedding, etc. The main unit might get hot, causing fire, injure, burns or a fault.

Built-in battery

(The built-in battery of the product is a lithium polymer battery.)

When you purchase your cell phone, it is not fully charged.

Charge the battery before using the product.

Be sure to read the following hazards before use.

- If the leaked liquid gets on your skin or clothes, immediately rinse it off with water to avoid injury. If the liquid gets into your eyes, do not rub, but after wash your eyes with water, and immediately consult a doctor to avoid the risk of losing your eyesight. If the liquid gets on a device, wipe it off without touching it.
- The built-in battery is a consumable item. If the performance of a battery does not recover (e.g. the usable time after each charge has become extremely short), the battery is at the end of service life, so stop its use. Failure to do so might cause overheating, fire, rupture, or leakage. Because the battery is a built-in type, an au shop will accept holding over and repair for a charge. You may not use the product for a certain period. Please be forewarned. Note that the length of service life varies depending on the usage condition, etc.

Charging equipment

Be sure to read the following warnings before use.

- Do not use at other voltages than the specified power supply voltage. Doing so might cause ignition, fire, overheating, injure or electric shock.
 - AC adapter (sold separately): 100 VAC to 240 VAC
 - Common DC adapter O3 (sold separately) : 12/24 VDC (for negative grounded vehicles only)
- Firmly insert the plug of the specified charging equipment (sold separately) into the power outlet or cigarette lighter socket down to the base of its pins. Incomplete insertion of the power plug might result in electric shock, overheating, ignition, injure and fire. Do not use the damaged specified charger, power outlet or cigarette lighter socket with loose insertion connector.

- If the fuse in the common DC adapter O3 (sold separately) blows, replace it with a fuse of the specified type (250 V, 1A). Replacing with a different type of fuse might cause overheating or fire. (For information about fuse replacement, carefully read the manual for the common DC adapter O3 (sold separately).)

- Do not scratch the IC (metal) part of the au Nano IC Card (LTE). Doing so may cause a fault.

- Do not let your hands, fingers and other parts of the body touch the connection terminals. Doing so might cause electric shock, injure, short circuit or fire.

- Do not let your hands, fingers and other parts of the body touch the connection terminals. Doing so might cause electric shock, injure or a fault.

- If you hear thunder, do not touch the power plug. Doing so might cause an electric shock as a result of a lightning strike.

- Before cleaning the specified charging equipment (sold separately), unplug its power plug from the outlet or cigarette lighter socket. If the plug remains plugged in when you clean the equipment, it might cause an electric shock or short circuit.

- Wipe off the dust on the power plug. Failure to do so might cause a fire, burns, or electric shock.

- Install and position in-car devices where they do not hinder driving or safety equipment such as airbags. It might cause a traffic accident. Install in-car devices following the instructions of their manuals.

- When the AC adapter is not to be used for a long time, disconnect the AC adapter's power plug from the power outlet. Doing so might cause fire or a fault

- Do not use in places subject to direct splashing with water, pet urine, or other liquids. Doing so might result in faults and injure resulting from overheating, fire, electric shock, or short-circuiting of electronic circuits. In the event that the product is splashed with liquid, immediately disconnect the AC adapter's power plug.

Be sure to read the following warnings before use.

- Do not use in humid places such as bath areas, or connect/disconnect the AC adapter with wet hands. Doing so might cause electric shock, injure or a fault.

- Charge the battery in a stable place. If placed on an inclined surface or wobbly stand, the product might fall causing injury or damage. Pay careful attention while vibrator is set. In addition, do not cover or wrap the product with a cloth or bedding. Doing so might cause a fire, injure or a fault.

- When unplugging the plug of the specified charging equipment (sold separately) from the power outlet, hold and pull the power plug. Pulling on the cable might damage it.

- Do not use the common DC adapter O3 (sold separately) with the car engine stopped. Doing so might result in draining of the car battery.

au Nano IC Card (LTE)

Be sure to read the following warnings before use.

- Do not put the au Nano IC Card (LTE) in a cooking apparatus such as a microwave oven or a pressure vessel. Doing so might cause melting, overheating, fuming, loss of data or a fault.

Be sure to read the following cautions before use.

- Be careful when attaching/removing the au Nano IC Card (LTE). Doing so might injure your hands or fingers.

- Use only the devices specified by the Company to insert the au Nano IC Card (LTE) in. Using a device not specified by the Company might cause loss of data or a fault. For the specified devices, contact an au shop or Customer Service Center.

- Do not disassemble or modify the au Nano IC Card (LTE). Doing so might cause loss of data or a fault.

- Do not use or leave the au Nano IC Card (LTE) in hot places such as by the fire or a heater. Doing so might cause melting, overheating, fuming, loss of data or a fault.

- Do not throw the au Nano IC Card (LTE) into a fire or heat it. Doing so might cause melting, overheating, fuming, loss of data or a fault.

- Do not touch the IC (metal) part of the au Nano IC Card (LTE) or short-circuit it. Doing so might cause loss of data or a fault.

- Do not drop the au Nano IC Card (LTE) or subject it to strong impact. Doing so may cause a fault.

- Do not fold, bend or place a heavy object on the au Nano IC Card (LTE). Doing so may cause a fault.

- Do not wet the au Nano IC Card (LTE). Doing so may cause a fault.

- Do not scratch the IC (metal) part of the au Nano IC Card (LTE). Doing so may cause a fault.

- Do not store the au Nano IC Card (LTE) in dusty places. Doing so may cause a fault.

- Do not store the au Nano IC Card (LTE) in places exposed to direct sunlight or hot and humid places. Doing so may cause a fault.

- Store the au Nano IC Card (LTE) out of reach of small children. Accidental swallow might cause suffocation, injury, etc.

LG TV antenna cable O1

- LG TV antenna cable O1 is not waterproof. Do not splash with water or other liquids. Also, never use in places subject to direct splashing with water or pet urine, etc. or in humid places such as bath areas, or use with wet hands. Doing so might cause electric shock, fault from overheating, fire, electric shock or corrosion of electronic circuits.

Be sure to read the following cautions before use.

- Do not make the connecting plug of LG TV antenna cable O1 dirty. Doing so may cause a fault.

- Insert or remove the connecting plug of LG TV antenna cable O1 into/from the earphone jack straightly.

- If you feel any abnormality with your skin, immediately consult

Specific Absorption Rate (SAR) of Cell Phones

This model LGL24 mobile phone complies with Japanese technical regulations and international guidelines regarding exposure to radio waves.

This mobile phone was designed in observance of Japanese technical regulations regarding exposure to radio waves* and limits to exposure to radio waves recommended by a set of equivalent international guidelines. These international guidelines were set out by the International Commission on Non-Ionizing Radiation Protection (ICNIRP), which is in collaboration with the World Health Organization (WHO), and the permissible limits include a substantial safety margin designed to assure the safety of all persons, regardless of age and health condition.

The Japanese technical regulations and international guidelines define the limits using a unit of measurement known as the Specific Absorption Rate (SAR), which represents the average amount of radio frequency energy absorbed by the human. The SAR limit for mobile phones is 2.0 W/kg, the highest SAR value for this mobile phone when tested for use at the ear is 0.161W/kg. The highest SAR value for this mobile phone when tested for use on the body is 0.338W/kg. There may be slight differences in SAR levels among individual products, but they all satisfy the limit.

The actual SAR of this mobile phone while talking on the phone can be well below that indicated above. This is due to automatic changes in the power level of the mobile phone to ensure it only outputs the minimum power required to communicate with a base station. Therefore in general, the closer you are to a base station, the lower the power output of the mobile phone.

This mobile phone can be used in positions other than against your ear. Use an accessory such as a carrying case, etc. so that you can hold the product at least 1.5 cm away from your body and also do not contain metal parts between the product and your body. By doing this, this mobile phone complies with Japanese technical regulations and international guidelines regarding exposure to radio waves.

The World Health Organization has stated that present scientific information does not indicate that use of mobile devices has any harmful effects on the human body. They recommend that if you are still worried about your exposure then you can limit your talk time or use a handsfree kit to keep the mobile phone away from your head and body. If you would like to know more detailed information, please refer to the WHO website. **http://www.who.int/docstore/peh-emf/publications/facts_press/fact_english.htm**

Please refer to the websites listed below if you would like to know more detailed information regarding SAR.

○ **Ministry of Internal Affairs and Communications Website:**
http://www.tele.soumu.go.jp/1/e/e/index.htm

○ **Association of Radio Industries and Businesses Website:**
http://www.arib-ermf.org/index02.html (in Japanese only)

○ **au Website:**

○ **LG Electronics Inc. Website:**
Refer to "Specifications" page of this product.
http://www.lg.com/jp/mobile-phone (in Japanese only)
(URL are subject to change without notice.)

* Technical regulations are defined by the Ministerial Ordinance Related to Radio Law (Article 14-2 of Radio Equipment Regulations).

Declaration of Conformity

The product "LGL24" is declared to conform with the essential requirements of European Union Directive 1999/5/EC Radio and Telecommunications Terminal Equipment Directive 3.1(a), 3.1(b) and 3.2.

This mobile phone complies with the EU requirements for exposure to radio waves. Your mobile phone is a radio transceiver, designed and manufactured not to exceed the SAR* limits** for exposure to radio-frequency (RF) energy, which SAR* value, when tested for compliance against the standard was 0.320 W/kg at the ear, and 0.433 W/kg when worn on the body. To comply with the RF Exposure limits a distance of greater than 1.5 cm must be maintained from the user's body.

While there may be differences between the SAR* levels of various phones and at various positions, they all meet*** the EU requirements for RF exposure.

*The exposure standard for mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR.

**The SAR limit for mobile phones used by the public is 2.0 watts/kilogram (W/kg) averaged over ten grams of tissue, recommended by The Council of the European Union. The limit incorporates a substantial margin of safety to give additional protection for the public and to account for any variations in measurements.

***Tests for SAR have been conducted using standard operating positions with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a base station antenna, the lower the power output.

European Union Directives Conformance Statement

CE0168

Hereby, LG Electronics Inc. declares that this product is in compliance with:

- The essential requirements and other relevant provisions of Directive 1999/5/EC
- All other relevant EU Directives

The above gives an example of a typical Product Approval Number.

Wi-Fi(WLAN)	This device is intended for sale in Japan only. This equipment may be operated in all European countries. The 5 150 - 5350 MHz band is restricted to indoor use only.
--------------------	---

Important Safety Information

AIRCRAFT

Switch off your wireless device when boarding an aircraft or whenever you are instructed to do so by airline staff. If your device offers a "flight mode" or similar feature consult airline staff as to whether it can be used on board.

DRIVING

Full attention should be given to driving at all times and local laws and regulations restricting the use of wireless devices while driving must be observed.

HOSPITALS

Mobile phones should be switched off wherever you are requested to do so in hospitals, clinics or health care facilities. These requests are designed to prevent possible interference with sensitive medical equipment.

PETROL STATIONS

Obey all posted signs with respect to the use of wireless devices or other radio equipment in locations with flammable material and chemicals. Switch off your wireless device whenever you are instructed to do so by authorized staff.

INTERFERENCE

Care must be taken when using the phone in close proximity to personal medical devices, such as pacemakers and hearing aids.

Pacemakers

Pacemaker manufacturers recommend that a minimum separation of 15 cm be maintained between a mobile phone and a pacemaker to avoid potential interference with the pacemaker. To achieve this use the phone on the opposite ear to your pacemaker and do not carry it in a breast pocket.

Hearing Aids

Some digital wireless phones may interfere with some hearing aids. In the event of such interference, you may want to consult your hearing aid manufacturer to discuss alternatives.

NOTE : Excessive sound pressure from earphones and headphones can cause hearing loss.

 To prevent possible hearing damage, do not listen at high volume levels for long periods.

For other Medical Devices :

Please consult your physician and the device manufacturer to determine if operation of your phone may interfere with the operation of your medical device.

CAUTION

RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE. DISPOSE OF USED BATTERIES ACCORDING TO THE INSTRUCTIONS.

FCC Notice

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help and for additional suggestions.

Warning

The user is cautioned that changes or modifications not expressly approved by the manufacturer could void the user's authority to operate the equipment.

FCC RF Exposure Information

This model phone is a radio transmitter and receiver.

It is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. Government.

The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health.

The exposure standard for wireless handsets employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/kg. The tests are performed in positions and locations (e.g., at the ear and worn on the body) as required by the FCC for each model.

The SAR value for this model handset when tested for use at the ear is 0.29 W/kg and when worn on the body, as described in this user guide, is 0.52 W/kg.

Body-worn Operation

This phone was tested for typical body-worn operations with the back of the phone kept at a distance of 1.5 cm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 1.5 cm separation distance between your body and the back of the phone. The use of belt clips, holsters and similar accessories should not contain metallic components.

The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided. The FCC has granted an Equipment Authorization for this model handset with all reported SAR levels evaluated as in compliance with the FCC RF emission guidelines. SAR information on this model handset is on file with the FCC and can be found under the Display Grant section of <http://www.fcc.gov/oet/ea/fccid/> after searching on FCC ID ZNFLGL24.

Additional information on Specific Absorption Rates (SAR) can be found on the Cellular Telecommunications & Internet Association (CTIA) website at <http://ctia.org/>.

Export Administration

Regulations This product and its accessories may fall under the category of application of Japan Export Control Regulations ("Foreign Exchange and Foreign Trade Law" and relevant laws and regulations). U.S. Re-export Regulations (Export Administration Regulations) is applied to this product and its accessories. If you export or re-export this product or its accessories, please follow the necessary procedures at your own risk and expense. For details on the procedures, contact the Ministry of Economy, Trade and Industry or the U.S. Department of Commerce.

^[1] This model LGL24 mobile phone complies with Japanese technical regulations and international guidelines regarding exposure to radio waves

^[2] This mobile phone was designed in observance of Japanese technical regulations regarding exposure to radio waves* and limits to exposure to radio waves recommended by a set of equivalent international guidelines

^[3] The Japanese technical regulations and international guidelines define the limits using a unit of measurement known as the Specific Absorption Rate (SAR), which represents the average amount of radio frequency energy absorbed by the human

^[4] The World Health Organization has stated that present scientific information does not indicate that use of mobile devices has any harmful effects on the human body

^[5] They recommend that if you are still worried about your exposure then you can limit your talk time or use a handsfree kit to keep the mobile phone away from your head and body

^[6] If you would like to know more detailed information, please refer to the WHO website
