### "Messages" application

Use "Messages" application to send or receive SMS and MMS (@ezweb.ne.jp).

- SMS is a service for cell phone users to send and receive messages via phone number. You can also send messages to an overseas phone number.
- MMS (@ezweb.ne.jp) is a service that you can send or receive messages with cell phones and PCs that support MMS. After initial settings, you will get an MMS address automatically. You can change the MMS address later.

- When using MMS (@ezweb.ne.jp), subscription to LTE NET is required. If you did not subscribe to it, contact an au shop or Customer Service Center.
- The initial settings and the sending/receiving MMS (@ezweb.ne.jp) cannot be used via wireless LAN (Wi-Fi®).
- When using SMS, the initial settings of MMS are required.

### Initial settings of MMS

#### ■ For new contracts (customers newly acquiring @ezweb.ne.jp address)

Slide the status bar downwards ► Disable "Wi-Fi" and turn on "Data connection"

\* This setting cannot be used via wireless LAN (Wi-Fi).

Tap "Messages" on the home screen

When the screen related to mail address settings is displayed, confirm the contents and tap "OK"

Tap "Messages" on the Messages screen

In "To:" field, input "0009008" ► In "Message" field, input "1234" ► Tap "►"

After sending, you will receive a message with a URL in it.

Tap the URL in the received message

Tap "メールアドレス変更・迷惑メールフィルター・自動転送 (Change mail address/Spam filter/Auto sending)" ► Follow the screen instructions to change the MMS address

After changing the MMS address, you will receive a message with a new MMS address in it.

\* The 4-digit password you set at the time of purchase is required.

Tap the MMS address included in the received message that was set in step 7

Tap "Register own mail address"

Tap "OK" Initial settings of MMS complete.

## ■ For model changes (customers using @ezweb.ne.jp address)

Slide the status bar downwards ► Disable "Wi-Fi" and turn on "Data connection"

\* This setting cannot be used via wireless LAN (Wi-Fi)\*.

Tap "Messages" on the home screen

When the screen related to mail address settings is displayed, confirm the contents and tap "OK"

Tap "..." on the Messages screen

Tap "Settings"

In "Mail address" field, input the MMS address registered before changing the model ► Tap "X"

Tap "X" on the Messages screen

In "To:" field, input "00090008" ► In "Message" field, input "1234" ► Tap "►"

After sending, you will receive a message with a URL in it.

Tap the URL in the received message

Tap "メールセンターに蓄積されているMMSメッセージを再配信します (Re-deliver the MMS messages stored in the mail center)"

MMS accumulated during model changing procedure are received. Initial settings of MMS complete.

memo

- On the home screen, tap "Messaging Settings" ► "Mail address" field to input the MMS address you set.
