Setting a Google Account

You can use online services provided by Google, such as Gmail and Google Play, by setting up a Google account.
This section describes how to set up an account on the initial settings screen, which appears when you first switch on the power after purchasing the product.

User name	Register your Google account (user ID) and the characters that you want to use as your mail address. You can register any user name, but you cannot set the same user name as another user's.
Password	Register password for the Google account.

Select "English (United States)" and tap "Next"

Tap a network that you will connect to
* Tap "Next" if you do not need to set internet connection.

Enter your password → "Connect" → Confirm the connection → Tap "Next"
* This step is not required if you select a Wi-Fi® network without security settings.

"No" → Tap "Get an account"
* If you already have a Google account, tap "Yes".

Enter your first and last names and "▓" → Enter your email address and "▓" → Enter your password and tap "▓"
* Email addresses already being used by another user cannot be used.
* Enter the password twice for confirmation.

"Set up recovery options" → Enter a mail address for back up → tap "▓"
* Recovery email address will be used in case you forget your password. Input can be omitted.

Confirm the contents → Tap "▓"

"I accept" → Enter the text displayed → tap "▓"

Tap "Not now"
* If you are joining Google+, tap "Get started".

Tap "Skip"
* If you are purchasing applications from Google Play, enter payment information.

Setting LG Accounts as required
* Tap "Skip" if you do not need to set internet connection.

Check if you agree software update and log information → "Next" → Set Knock Code as required
* Tap "Skip" if you do not need to set Knock Code.

Select a home touch combination and a theme → Tap "Next"

Enter your phone name and contact in case of loss → Tap "Done"

au Easy Settings

■ Setting au ID

This section describes how to set up an au ID on the initial settings screen, which appears when you first turn on the power after purchasing the product.
The settings can be changed with the "au ID Setting" application.

au ID*	Register your au phone number or any other character string as an au ID.
au ID password	Register the password for the au ID.

* The same au ID as another user's cannot be registered.

Tap "Next"

Tap "Register "au ID"" → "Next"

Tap "au IDの設定・保存 (Set/Save au ID)"

Enter the security code → Tap "OK"

Set the password → Tap "設定 (Set)"

Tap "終了 (Done)"

Tap "Update" → "Next"

Check the terms and conditions→ Tap "Agree" → "Next"

Tap "Agree"
* Pre-configuration of Lookout for au is complete.

Place check marks on data to be stored (backed up) automatically → tap "Next".
* When a different screen from the above appears, follow the displayed screen.

Place check marks on an app to be installed → Tap "次 へ(Next)"

Confirm the contents and tap "Yes"/"No" → "Next"

When using Text While Walking Alert, tap "Activate" → "Next"
* When not using it, tap "Skip activation" → "Next".

Tap "Finish"
* When a different screen from the above appears, follow the displayed screen.

Setting Wireless LAN (Wi-Fi®)

By using the wireless LAN (Wi-Fi®) function, you can access to the Internet using a wireless LAN environment built in your home or a public wireless LAN environment away from home.
When setting the wireless LAN (Wi-Fi®) as described in this guide, you need to be in an environment where the radio waves can be received from the wireless LAN device or public wireless LAN that you want to access to.
Check the following information before setting the wireless LAN (Wi-Fi®) function.

SSID	The name set for the wireless LAN device or public wireless LAN service that you are connecting to
Password	The password for connecting to the wireless LAN device or public wireless LAN service

* Connection to all public wireless LAN services is not guaranteed.
* You may need a separate contract with a service provider to use some public wireless LAN services.
* Enabling the wireless LAN (Wi-Fi®) function uses a lot of battery power. We recommend turning off the wireless LAN (Wi-Fi®) function when not using it.

On the home screen, touch and hold "▭" → "System settings"

"Networks" tab → Tap "Wi-Fi"

When "Wi-Fi tutorial"[1] appears, tap "Continue"

Tap "OK"[1]→"▭"

"OK"[1] → Tap the SSID of the wireless LAN (Wi-Fi®) network that you are connecting to
* If the wireless LAN (Wi-Fi®) network that you want to connect to is not displayed, tap "▤" → "Add network" and register it manually.

The wireless LAN (Wi-Fi®) function is enabled, and the available wireless LAN (Wi-Fi®) networks are detected.

Tap "OK"[1]

Enter Password → Tap "Connect"
* This step is not required if you select a wireless LAN (Wi-Fi®) network without security settings.

When "Connected" appears under SSID, connection is complete.

[1] "Wi-Fi tutorial" will not be displayed when setting up for the second time or later. The contents displayed in initial setting may vary depending on Wi-Fi® connection setting. If you want to display Wi-Fi tutorial again, in Wi-Fi setting screen, tap "▤" → "Interactive tutorial".

E-mail (@ezweb.ne.jp) is a service that enables you to exchange e-mails with other cell phones, which support e-mail, and with PCs. Your e-mail address is decided automatically after the initial settings.
The e-mail address in the initial settings can be changed.
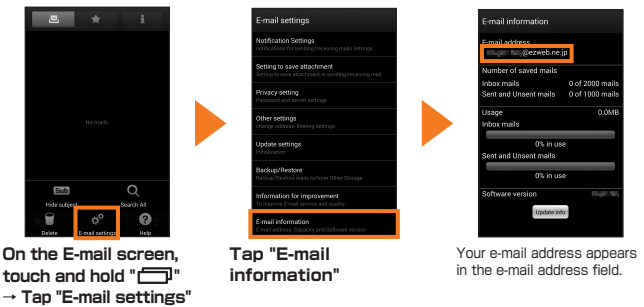

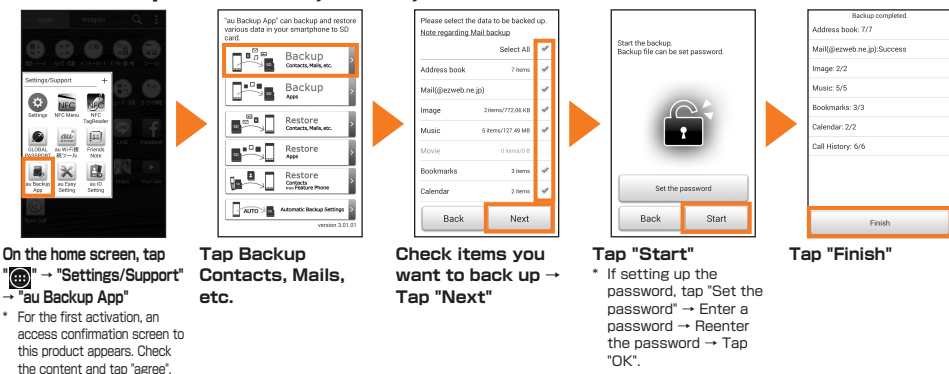

■ Initial Settings

On the home screen, tap "🖂"

Confirm the contents →Tap "接続する (Connect)"
* Once the initial settings for e-mail are completed, your e-mail address card into the product.

Check E-mail address →Tap "閉じる(Close)".
* When "Information for improvement" appears, confirm the content and follow the onscreen instructions.

■ Confirming your e-mail address
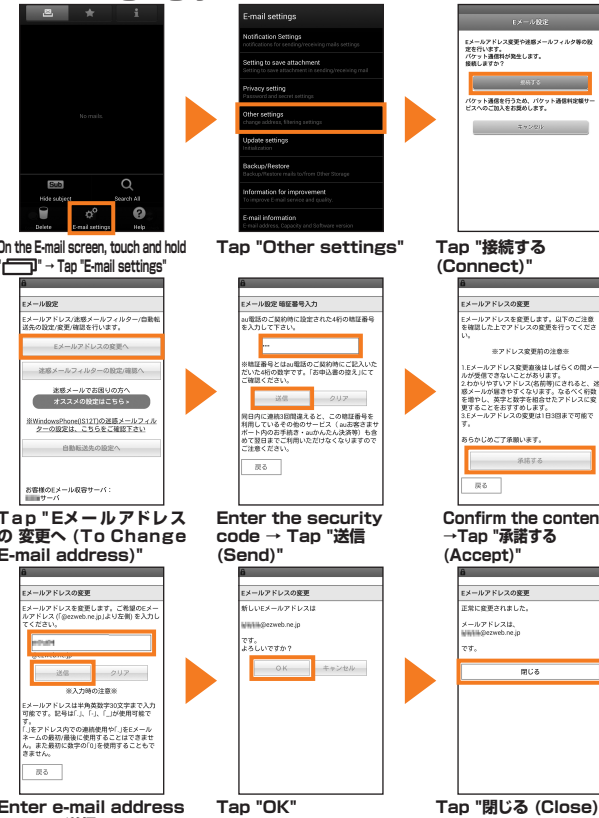

On the E-mail screen, touch and hold "▭" → Tap "E-mail settings"

Tap "E-mail information"

Your e-mail address appears in the e-mail address field.

■ Changing your e-mail address

On the E-mail screen, touch and hold "▭" → Tap "E-mail settings"

Tap "Other settings"

Tap "接続する (Connect)"

Tap "Eメールアドレスの変更へ (To Change E-mail address)"

Enter the security code → Tap "送信 (Send)"

Confirm the contents →Tap "承諾する (Accept)"

Enter e-mail address → Tap "送信 (Send)"

Tap "OK"

Tap "閉じる (Close)"

■ E-mail backup

You can back up your e-mails to the product or a microSD memory card. The product can also retrieve the backup data that has been saved. The save destination is as follows.

| Internal storage in the product | /storage/emulated/0/private/au/email/BU |
| microSD memory card | /storage/external_SD/private/au/email/BU |

On the E-mail screen, touch and hold "▭" → Tap "E-mail settings"

Tap "Backup/Restore"

Tap "Mail Backup" → "OK"
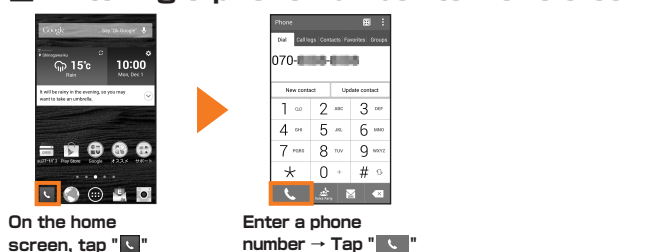

Select character code to make backup data → Tap "OK"

Place check marks on a mail type to back up → Tap "OK"

"Backed up." appears when the backup is complete.

PC mail
PC mail can be used to send/receive E-mail from this product by setting a mail account that you normally use on your PC.

Gmail
Gmail is a mail service provided by Google. You can send/receive Gmail from this product. You can also use Gmail from the PC or the browser on this product and share mail information.

■ Entering a phone number to make a call

On the home screen, tap "📞"

Enter a phone number → Tap "📞"
