Sold by: KDDI CORPORATION, OKINAWA CELLULAR TELEPHONE COMPANY
Imported by: LG Electronics Japan, Inc.
Manufactured by: LG Electronics Inc.
April 2015, 1st Edition

- **Learning the Basic Operations**
  Describes the names of parts and operation.
- **Initial Settings**
  Described in the steps for the following:
  ・Language settings, Accessibility
  ・Wireless LAN (Wi-Fi®) settings
  ・Google account settings
  ・Other settings
- **au Easy Settings**
  Sets au ID and services.
- **E-mail Settings and Backup**
  Sets up to use e-mail (@ezweb.ne.jp).
- **Making Calls**
  You can also make a call using call logs or contacts.

- **Receiving Calls**
  You can also receive a call in sleep mode.
- **Transferring Contacts**
  You can transfer your contacts data from your previous au phone.
- **How to Transfer Data from the au Settings Menu**
  You can restore/backup data from your previous au phone to this product using a microSD memory card or au servers.
- **Reducing Battery Consumption**
  You can reduce the battery consumption by setting up Battery saver.
- **Setting Up Weather Information**
  You can check weather information on the Home screen.

■ Basic operations of the keys

Power key (rear)
- ●Power ON
  Press and hold the power key.
- ●Power OFF
  Press and hold the power key → Select "Power off" → "OK".
- ●Sleep mode
  Press the power key in operation to switch to sleep mode.
- ●Cancel sleep mode
  Press the power key in sleep mode to display the unlock screen.

Display (Touch panel)
Directly touch an item or key displayed on the screen to operate.

○ **Home key**
Use it to display the home screen, etc.

□ **Task key**
Check running applications.

◁ **Back key**
Goes back to the previous screen.

●Unlocking the screen
Swipe on the unlock screen to unlock.

■ Basic operations of the touch panel
The display on the product is a touch panel operated by touching it with your finger.

Tap/Double tap
Lightly touch an icon or item and immediately release your finger. Tapping the same place twice is called a double tap.

Touch and hold
Keep touching an item with your finger.

■ Basic operations to input characters
This product uses the software keyboard displayed at the bottom of the screen to enter characters.
Tap the keys on the screen to enter characters.

① Switches to voice typing.
  Touch and hold → tap " ⌨ " to switch to a QWERTY keyboard.
② Moves the cursor to the right/left and changes the range of characters when converting characters.
③ Enter numbers/pictograms/symbols/emoticons.
④ Switches the Input Mode.
⑤ Switches upper case/lower case of entering character.
⑥ Inputs the characters of each key.
⑦ Deletes the character to the left of the cursor.
⑧ Inputs a space and converts characters in Hiragana-Kanji input mode.
⑨ Start a new line/confirm the characters input.

Flick input

Flick guide

You can flick the key up, down, right, or left to enter a character. Touch and hold the key to display the candidates that can be entered by flicking (flick guide). You can then check candidates that you can enter before flicking to enter a character.

Slide
While your finger is lightly touching the screen, move it in the desired direction.

Flick (Swipe)
Quickly move (flick) your finger up, down, right, or left.
■ How to read the notification panel
When a notification icon appears on the left side of the status bar, slide the status bar down to open the notification panel to check the notification or launch the application.

Slide the status bar down

The notification panel appears.

■ Smart Notice
Displays notifications (card notifications), such as current time, weather information, and terminal information.

① Displays weather information.
  For details about weather information settings, refer to "Setting Up Weather Information".
② Displays date and time.
③ Displays notifications from Smart Notice. You can check notifications that are not displayed by tapping this area.
④ Updates weather information.
⑤ Tap this to display Smart Notice settings.

Pinch
Touch the screen with two fingers and widen (pinch-out) or narrow (pinch-in) the fingers' distance.

Drag
Keep touching items or icons and trace to the desired position.

Initial Settings : STEP1

■ Setting the language, accessibility
This section describes the initial settings screen that appears when you turn on the power for the first time.

●Setting the language

"English (United States)" → select language → "Next"
* Once you select your desired language, the language for the initial settings screen also changes. After changing the language, follow the instructions on the screen.

●Setting up Accessibility

"Accessibility" → review the precautions, "YES" → set Accessibility → " ◁ " → "Next"
* The operations herein differ depending on the configured Accessibility settings.

Initial Settings : STEP2

■ Setting Wireless LAN (Wi-Fi®)
By using the wireless LAN (Wi-Fi®) function, you can access to the Internet using a wireless LAN environment built in your home or a public wireless LAN environment away from home.
When setting the wireless LAN (Wi-Fi®) as described in this guide, you need to be in an environment where the radio waves can be received from the wireless LAN device or public wireless LAN that you want to access to.
Check the following information before setting the wireless LAN (Wi-Fi®) function.

SSID	The name set for the wireless LAN device or public wireless LAN service that you are connecting to
Password	The password for connecting to the wireless LAN device or public wireless LAN service

* Connection to all public wireless LAN services is not guaranteed.
* You may need a separate contract with a service provider to use some public wireless LAN services.
* Enabling the wireless LAN (Wi-Fi®) function uses a lot of battery power. We recommend turning off the wireless LAN (Wi-Fi®) function when not using it.

Place a checkmark on "Wi-Fi" → tap the network that you are connecting to
* If you are not going to configure these settings, tap "Next".

Enter Password → "CONNECT" → confirm the connection → "Next"
* This step is not required if you select a wireless LAN (Wi-Fi®) network without security settings.

Initial Settings : STEP3

■ Setting a Google Account
You can use online services provided by Google, such as Gmail and Google Play, by setting up a Google account.
This section describes how to set up an account on the initial settings screen, which appears when you first turn on the power after purchasing the product.

User name	Register your Google account (user ID) and the characters that you want to use as your mail address. You can register any user name, but you cannot set the same user name as another user's.
Password	Register password for the Google account.

"SKIP"
* For more details about Tap & Go, tap "Learn more".

"Or create a new account"
* If you already have a Google account, enter email address.

Enter your first and last names → "NEXT" → enter your user name → "NEXT" → enter your password → "NEXT"
* Email addresses already being used by another user cannot be used.

Confirm your phone number → "NEXT" → "VERIFY"
* Recovery phone number will be used in case you forget your password. Input can be omitted.

Confirm the contents → "AGREE"

"NEXT"

"Remind me later" → "NEXT"
* If you are purchasing applications from Google Play, enter payment information.

"SET SCREEN LOCK NOW" → set up screen lock → "OK"

Check the details of Google services → "NEXT"

Initial Settings : STEP4

■ Setting others

Confirm the EULA (End-User License Agreement) → place a checkmark on "I agree" → "Next"

Confirm the Terms of Use → place a checkmark on "I agree" → "Next"

au Easy Settings

■ Setting au ID
You can setup convenient au functions and services.
This section describes how to set up an au ID on the initial settings screen, which appears when you first turn on the power after purchasing the product.
The settings can be changed with the "au ID Setting" application.

au ID *	Register your au phone number or any other character string as an au ID.
au ID password	Register the password for the au ID.

* The same au ID as another user's cannot be registered.
● After completing initial settings, you can also setup au services on the Home screen by tapping " ⊞ " → "Settings" → "General" tab → "au Settings menu" → "au Easy Setting".

"Next"

"Register "au ID"" → "Next"

"au IDの設定・保存 (Set/Save au ID)"

Enter the security code → "OK"

Enter the password → "設定 (Set)"

"終了 (Done)"

"Update" → "Next"

Confirm the terms of use → "Agree" → "Next" → "Agree"*1
* If you selected "Disagree", the au Easy Setting Completed screen will appear.
*1 Presetting of Lookout for au completes.

Confirm the details and select "Turn Auto Backup on"/"Turn Auto Backup off" → "Next"
* If you want to use the "Data backup" application to automatically backup your photos and contacts to the au Smart Pass server, select "Turn Auto Backup on".

Place checkmarks on an app to be installed → "次へ (Next)"
* If an application needs to be restored, the Application Restore screen appears.

Confirm the contents and "Activate"/"Skip activation" → "Next"

When using Texting While Walking Alert App, "Activate" → "Next"
* When not using it, tap "Skip activation" → "Next".

Place checkmarks on the data you want to restore → "次へ (Next)"
* If there is not data to be restored, this screen will not be displayed.

"Finish"
* When a different screen from the above appears, follow the displayed screen.

E-mail Settings and Backup

E-mail (@ezweb.ne.jp) is a service that enables you to exchange e-mails with other cell phones, which support e-mail, and with PCs. Your e-mail address is decided automatically after the initial settings.
The e-mail address in the initial settings can be changed.

■ Initial Settings

On the home screen, " 🖂 "

Confirm the contents → "接続する (Connect)"
Once the initial settings for e-mail are completed, your e-mail address appears.

Confirm E-mail address → "閉じる (Close)"
* When "Information for improvement" appears, confirm the content and follow the onscreen instructions.

■ Confirming your e-mail address

On the E-mail screen, touch and hold " □ " → "E-mail settings"

"E-mail information"

Your e-mail address appears in the e-mail address field.

■ Changing your e-mail address

On the E-mail screen, touch and hold " □ " → "E-mail settings"

"Other settings"

"接続する (Connect)"

On the E-mail screen, touch and hold " □ " → "E-mail settings"

"Eメールアドレスの変更 (To Change E-mail address)"

Enter the security code → "送信 (Send)"

Confirm the contents → "承諾する (Accept)"

Enter e-mail address → "送信 (Send)"

"OK"

"閉じる (Close)"

■ Backing up e-mails

You can back up your e-mails to the product or a microSD memory card.
The product can also retrieve the backup data that has been saved.
The save destination is as follows.

| Internal storage in the product | /storage/emulated/0/private/au/email/BU |
| microSD memory card | /storage/external_SD/private/au/email/BU |

On the E-mail screen, touch and hold " □ " → "E-mail settings"

"Backup/Restore"

"Mail Backup" → "OK"

Select character code to make backup data → "OK"

Place checkmarks on a mail type to back up → "OK"

"Backed up." appears when the backup is complete.

■ PC mail

PC mail can be used to send/receive e-mail from this product by setting a mail account that you normally use on your PC.

On the home screen, " □ " → "Tool" → "Email"

●Using PC mail for the first time
Setup a PC mail account.
On the PC mail screen, select an e-mail provider → enter a PC mail address and password → "Next" → enter an account name → "Done".
* If you need to manually enter the settings, contact your service provider or system administrator for the correct PC mail account settings.

■ Gmail

Gmail is a mail service provided by Google. You can send/receive Gmail from this product.
You can also use Gmail from the PC or the browser on this product and share mail information.

On the home screen, "Google" → "Gmail"

Making Calls

■ Entering a phone number to make a call

On the home screen, " ☎ "

Enter a phone number → " ☎ "

■ Calling from Contacts

On the phone screen, tap "Contacts" tab

Tap the other party to be called
* Tap " ☎ " to skip the contact details screen and directly make a call.

Tap a phone number

■ Calling from Call logs

On the phone screen, tap "Call logs" tab

Tap the other party to be called

Tap a phone number

Receiving Calls

You can receive a call in the following steps.
* "Display the popup on an incoming call" is set to ON in Sync call settings by default.

"Accept" during an incoming call

The call starts.

"END" to end the call

■ Receiving a call during sleep mode

You can receive a call in the same manner even when Sync Call is OFF.

Slide "Answer" during an incoming call

The call starts.

"End" to end the call

■ Rejecting an incoming call

When you reject a call, the caller is informed that there is no response.

"Decline" during an incoming call

Transferring Contacts

You can transfer data from your previous phone to this product using a microSD memory card.

Save the contacts (address book) from your previous phone to a microSD memory card, and insert the card into the product
Refer to the instruction manual of your previous phone, etc. on how to save the contacts.

On the home screen, "基本 (Basic)" → "Contacts"

" □ " → "Manage contacts" → "Import"

"SD card" → "OK"

Place checkmarks on the item to be imported → "IMPORT"

"YES"

* Select the account or location that you want to import data to select if a saving location screen does appear.

How to transfer data from the au Settings menu

You can restore/backup data from your previous au phone to this product using a microSD memory card or au Smart Pass servers.
• You need to setup an au ID to restore or save data using au Smart Pass servers.
• If you use a microSD memory card to restore data, save the data from your previous au phone to a microSD memory card.

■ How to restore data from the au Settings menu

On the home screen, "基本 (Basic)" → "Settings"

"General" tab → "au Settings Menu"

"Data Transfer"

"データを戻す (Restore data)"
* You need to setup an au ID to restore data using "auスマートパスから戻す (Restore data from au Smart Pass)" (data backed up on au Smart Pass servers).

Select restore data from
* This screen is not displayed if you selected "auスマートパスから戻す (Restore data from au Smart Pass)" on the restore data method screen.

If you selected "SDカードから戻す (Restore data from an SD card)", select your previous au phone model

If you selected "SDカードから戻す (Restore data from an SD card)"

If you selected "auスマートパスから戻す (Restore data from au Smart Pass)"

Place checkmarks on the data to be restored, "戻す (Restore)" → "完了 (Done)"
* This screen is displayed if you selected "スマートフォンデータを戻す (Restore smartphone data)".

Place checkmarks on the data to be restored, "戻す (Restore)" → "完了 (Done)"

■ How to save data from the au Settings menu

On the home screen, "基本 (Basic)" → "Settings"

"General" tab → "au Settings Menu"

"Data Transfer"

"データを保存する (Save data)"
* You need to setup an au ID to save data from "auスマートパスに預ける (Save data to au Smart Pass)" (saving data to au Smart Pass servers).

Select save data to

If you selected "SDカードに保存する (Save data to an SD card)"

If you selected "auスマートパスに預ける (Save data to au Smart Pass)"

Place checkmarks on the data to be saved, "保存する (Save)" → "完了 (Done)"

Place checkmarks on the data to be saved, "預ける (Save)" → confirm the details, follow the instructions on the screen → "完了 (Done)"

If you want to use the "Data backup" application to automatically save your photos and contacts to the au Smart Pass server, you can set it up by following the procedure below.

On the home screen, "基本 (Basic)" → "Settings" → "General" tab → "au Setting Menu" → "Backup Setting" → "定期的に自動で預ける (Periodically save automatically)"

Reducing Battery Consumption

■ Using Battery Saver

Set up to switch to Battery Saver Mode automatically when the battery is running low.

On the home screen, "基本 (Basic)" → "Settings" → "General" tab → "Battery & power saving"

* Confirm the status such battery etc. on "BATTERY INFORMATION".

■ Set Battery saver on timing

On the Battery & power saving screen, "Battery saver"

"Turn Battery saver on" → Tap timing

Setting Up Weather Information

Display weather information for the set city.
Multiple cities can be set.

■ Set a city by entering it

On the Home screen, "Tap to enter a location" on Smart Notice → enter a city name → select a city from the candidates

■ Set your current city

On the Home screen, "Tap to enter a location" on Smart Notice → "Current location"

■ Manually update weather information

On the Home screen, " 🖼 " on Smart Notice
