Qua phone PX   Setting Guide

Thank you for purchasing the "Qua phone PX" (simply called the "product" from here on).
This "Setting Guide" describes the basic operations and initial settings for using the product.
For descriptions on various functions, refer to "Basic Manual" or "User Guide 取扱説明書 詳細版 (Full Instruction Manual)" (Japanese) on the au website.
Before using the product, be sure to read the "Notes on Usage" to ensure correct and safe use.

All other company names and product names are registered trademarks or trademarks of respective companies referred to in this manual.

The ® marks and TM marks may be omitted in this manual.

- ●Learning the Basic Operations
  Describes the names of parts and operation.
- ●Initial Settings
  Described in the steps for the following:
  ・Language settings, Accessibility
  ・Wireless LAN (Wi-Fi®) settings
  ・Google account settings
  ・Other settings
- ●au Easy Setting
  Sets au ID and services.
- ●E-mail Settings
  Sets up to use e-mail (@ezweb. ne.jp).
- ●Making a call
  You can also make a call using call logs or contacts.
- ●Receiving a call
  You can also receive a call in sleep mode.
- ●Transferring Contacts
  You can transfer your contacts data from your previous au phone.
- ●How to Transfer Data from the au Settings Menu
  You can restore/backup data from your previous au phone to this product using a microSD memory card or au servers.
- ●Reducing Battery Consumption
  You can reduce the battery consumption by setting up Battery saver.

Learning the Basic Operations

■ Basic operations of the keys

Power key (side)
●Power ON
Press and hold the power key.
●Power OFF
Press and hold the power key → Select [Power off] → [POWER OFF].
●Sleep mode
Press the power key in operation to switch to sleep mode.
●Cancel sleep mode
Press the power key in sleep mode to display the lock screen.

Display (Touch panel)
Directly touch an item or button displayed on the screen to operate.

○ Home button
Use it to display the Home screen.

□ Task button
Check running applications.

◁ Back button
Returns to the previous screen.

●Unlocking the screen
Swipe on the lock screen

■ Basic operations of the touch panel
The display of the product is a touch panel and you can touch directly with your finger to operate.

Tap/Double Tap
Lightly touch an icon or item and then immediately release your finger. Tapping the same place twice is called a double tap.

Touch and hold
Keep touching the screen.

Slide
While your finger is lightly touching the screen, move it in the desired direction.

Flick (Swipe)
Quickly move (flicking) your finger up, down, right, or left.

Pinch
Touch the screen with two fingers and widen (pinch-out) or narrow (pinch-in) the fingers' distance.

Drag
Keep touching items or icons and trace to the desired position.

■ Basic operations to input characters
This product uses the software keyboard displayed at the bottom of the screen to enter characters.
Tap the keys on the screen to enter characters.

① Switches to voice typing.
② Moves the cursor to the right/left and changes the range of characters when converting characters.
③ Enters pictograms/symbols/emoticons.
④ Switches the Input Mode.
  Touch and hold → tap [Keyboard type] to switch to a QWERTY keyboard or 50-key keyboard.
⑤ Switches upper case/lower case of entering character.
⑥ Inputs the characters of each key.
⑦ Deletes the character to the left of the cursor.
⑧ Inputs a space and converts characters in Hiragana-Kanji input mode.
⑨ Start a new line/confirm the characters input.

〈10-key〉
Switching the keyboard type
〈QWERTY〉
〈50-key〉

Flick input
You can flick the key up, down, right, or left to enter a character. Touch and hold the key to display the candidates that can be entered by flicking (flick guide).

Flick guide

■ How to read the notification panel
When a notification icon appears on the left side of the status bar, slide the status bar down to open the notification panel to check the notification or launch the application.

Slide down the status bar   The notification panel appears.

■ Setting Application Authority
When activating the applications/functions to access the functions or information of the product for the first time, the confirmation screen appears to request the permission for the access authority.
When the confirmation screen appears, confirm the content and tap "DENY" or "ALLOW".
- The explanation screen may be displayed depending on the application/function. Also, the confirmation screen may be displayed several times or the display may be different. Carefully check the displayed content, follow the onscreen instructions.
- If the application authority is not allowed, applications/functions may not be activated or using functions may be restricted.
- In this manual, description of the confirmation screens may be omitted.

Initial Settings: STEP1

■ Setting the language, accessibility
This section describes the initial settings screen that appears when you turn on the power for the first time.

●Setting the language

1
ようこそ

[日本語（日本）] → select language → [→]
* Once you select your desired language, the language for the initial settings screen also changes. From here on, follow the onscreen instructions.

●Setting up Accessibility

1
Welcome

After switching to the English display,
[Accessibility] → review the precautions, [YES] → set Accessibility → [◁] → [→]
* The operations herein differ depending on the configured Accessibility settings.

Initial Settings: STEP2

■ Setting Wireless LAN (Wi-Fi®)
By using the wireless LAN (Wi-Fi®) function, you can access to the Internet using a wireless LAN environment built in your home or a public wireless LAN environment away from home.
When setting the wireless LAN (Wi-Fi®) as described in this guide, you need to be in an environment where the radio waves can be received from the wireless LAN device or public wireless LAN that you want to access to.
Check the following information before setting the wireless LAN (Wi-Fi®) function.

SSID	The name set for the wireless LAN device or public wireless LAN service that you are connecting to
Password	The password for connecting to the wireless LAN device or public wireless LAN service

* Connection to all public wireless LAN services is not guaranteed.
* You may need a separate contract with a service provider to use some public wireless LAN services.
* Enabling the wireless LAN (Wi-Fi®) function uses a lot of battery power. We recommend turning off the wireless LAN (Wi-Fi®) function when not using it.

1
2
[ ] of "WI-FI" → tap the network that you are connecting to
* If you do not set up, tap [NEXT].

Enter Password → [CONNECT] → confirm the connection → [NEXT]
* This step is not required if you select a wireless LAN (Wi-Fi®) network without security settings.

Initial Settings: STEP3

■ Setting up Google account
You can use online services provided by Google, such as Gmail and Google Play, by setting up a Google account.
This section describes how to set up an account on the initial settings screen that appears when you turn on the power for the first time.

User name	Register your Google account (user ID) and the characters that you want to use as your mail address. You can register a desired name, but a name already registered by another user cannot be set.
Password	Register password for the Google account.

1
[No thanks] → [NEXT]
* To copy the settings of an Android device to the product, tap [Copy your Google Accounts, apps, and data from your other device].

2
[Or create a new account]
* If you have a Google account, enter the mail address.

3
Enter your first and last names → [NEXT] → enter your user name → [NEXT] → enter your password → [NEXT]
* User names already being used by another user cannot be used.

4
Confirm your phone number → [NEXT] → [VERIFY]

5
Confirm the contents → [I AGREE]

6
[NEXT]

7
Check the details of Google services → [NEXT]

8
[No thanks] → [CONTINUE]
* If you are purchasing applications from Google Play, enter payment information.

9
Set whether to protect the smartphone
* To set the screen lock, place a check mark on "Protect this device and require a PIN, pattern, or password to unlock the screen" → [NEXT] → set the unlock method of the lock screen, etc. → tap [OK].
* If you do not set up, clear the check mark on "Protect this device and require a PIN, pattern, or password to unlock the screen" → tap [SKIP] → [SKIP ANYWAY].

Initial Settings: STEP4

■ Other settings

1
Check legal documents → place check marks on "I agree" and "I agree (Optional)" → [DONE]

au Easy Setting

■ Setting au ID
You can setup convenient au functions and services.
This section describes how to set up an au ID on the initial settings screen that appears when you turn on the power for the first time.
The settings can be changed with the "au ID Setting" application.

au ID*	Register your au phone number or any other character string as an au ID.
au ID password	Register password for using au ID.

* The same "au ID" as another user's cannot be registered.
After completing initial settings, you can also setup au services on the Home screen by tapping [基本機能 (Basic functions)] → [Settings] → [au Settings Menu] → [au Easy Setting].

1
[Next]

2
[Register "au ID"] → [Next]

3
[au IDの設定・保存 (Set and save au ID)]

4
Enter the security code → [OK]

5
Enter a security password → [設定 (Settings)]

6
[終了 (End)]

7
[Update] → [Next]

8
Confirm the terms of use → [Agree] → [Next] → [Agree]
* If you selected [Disagree], the au Easy Setting Completed screen will appear.

9
Confirm the details and select [Turn Auto Backup on]/[Turn Auto Backup off] → [Next]
* If you want to use the "Data backup" application to automatically backup your photos and contacts to the au Smart Pass server, select [Turn Auto Backup on].

10
When using Texting While Walking Alert App, [Activate] → [Next]
* If you do not use it, tap [Skip activation] → [Next].

11
To use Lookout for au, [Activate] → [Next]
* If you do not use it, tap [Skip activation] → [Next].
* Allowing each authority of Lookout for au completes the pre-configuration.

12
Place checkmarks on the data you want to restore → [次へ (Next)]

13
Place checkmarks on the application to be installed → [次へ (Next)]

14
[Finish]
* When a different screen from the above appears, follow the displayed screen.

E-mail Settings

E-mail (@ezweb.ne.jp) is a service that enables you to exchange e-mails with other cell phones, which support e-mail, and with PCs. Your e-mail address is decided automatically after the initial settings. The e-mail address in the initial settings can be changed.
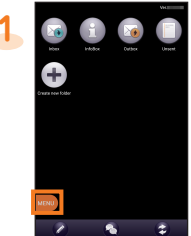

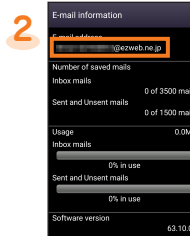

■ Initial Settings

1 On the Home screen, [📧]

2 Confirm E-mail address → [閉じる (Close)]
* If the confirmation screen for e-mail application appears, check the content and follow the onscreen instructions.

■ Confirming your e-mail address
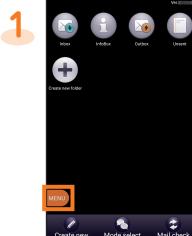

1 On the E-mail screen, [📧] → [E-mail information]
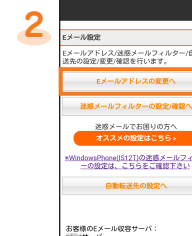

2 Your e-mail address appears in the e-mail address field.
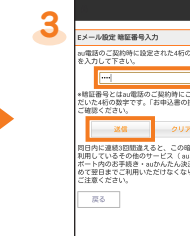

■ Changing your e-mail address
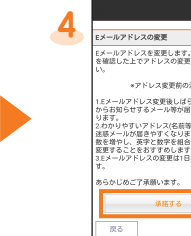

1 On the E-mail screen, [📧] → [Change Address/Setting Filter]
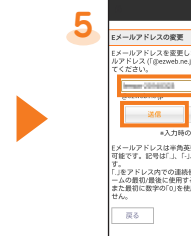

2 [Eメールアドレスの変更へ (To Change E-mail address)]
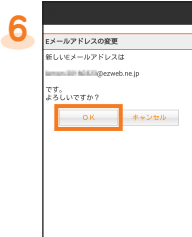

3 Enter the security code → [送信 (Send)]
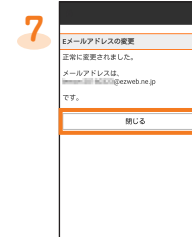

4 Confirm the contents → [承諾する (I accept)]

5 Enter e-mail address → [送信 (Send)]

6 [OK]
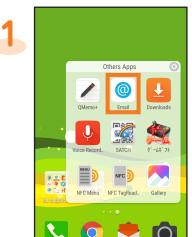

7 [閉じる (Close)]

■ PC mail

E-mail (🟠) can be used to send/receive e-mail from this product by setting a mail account that you normally use on your PC.
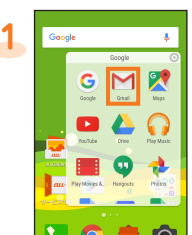

1 On the Home screen, [Other Apps] → [Email]

●Using PC mail for the first time
Setup a PC mail account. Activate this application and select an e-mail provider → enter a PC mail address and password → [NEXT] → follow the onscreen instructions.
* If you need to manually enter the settings, contact your service provider or system administrator for the correct PC mail account settings.

■ Gmail
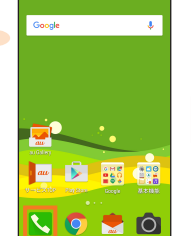

Gmail is a mail service provided by Google. You can send/receive Gmail from this product.
You can also use Gmail from the PC or the browser on the product and share mail information.
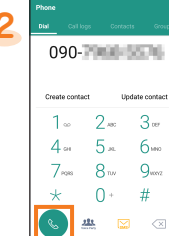

1 On the Home screen, [Google] → [Gmail]

Making Calls

■ Entering a phone number to make a call
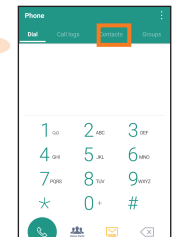

1 On the Home screen, [📞]
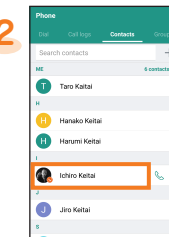

2 Enter a phone number → [🟢]
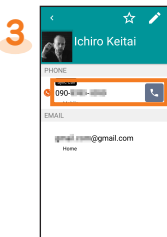

■ Calling from Contacts

1 On the phone screen, tap "Contacts" tab
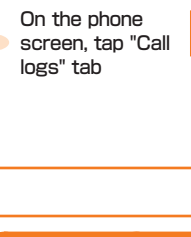

2 Tap the other party to be called
* Tap [📞] to skip the contact details screen and directly make a call.
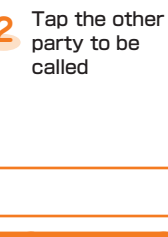

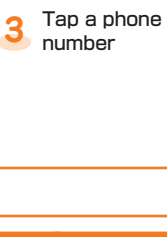

3 Tap a phone number

■ Calling from Call logs

**1** On the phone screen, tap "Call logs" tab

**2** Tap the other party to be called

3 Tap a phone number

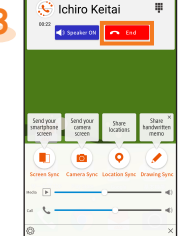

Receiving Calls

You can receive a call in the following steps.
* "Receive an incoming call over the operation screen" is set to "ON" in Sync Call settings by default. This section describes with the default setting mainly.

**1** [Accept] during an incoming call

2 The call starts.

**3** [End] to end the call

■ Receiving a call during sleep mode

You can receive a call in the same manner even when Sync Call is OFF

1 Flick (Swipe) up/down/left/right "Answer" during an incoming call

2 The call starts.

3 [End] to end the call

### ■ Rejecting an incoming call

When you reject a call, the caller is informed that there is no response.

**1** [Decline] during an incoming call

---

Transferring Contacts

You can transfer data from your previous phone to the product using a microSD memory card.

1 Save the contacts (address book) from your previous phone to a microSD memory card, and insert the card into the product
Refer to the instruction manual of your previous phone, etc. on how to save the contacts.

2 On the Home screen, [基本機能 (Basic functions)] → [Contacts] → "Contacts"

3 [📧] → [Manage contacts] → [Import]
* When a contact is not registered, tap [📧] → [Import] → the import source to proceed to step 5. If a saving location screen appears, select the desired account or location.

**4** [SD card] → [OK]
* If a saving location screen appears, select the desired account or location.

5 Place checkmarks on the item to be imported → [IMPORT]

6 [IMPORT]
* When the import is complete, "Contacts imported" appears.

How to transfer data from the au Settings menu

Return or store data from your previously used au phone to this product using a microSD card or the au Smart Pass server.
• You need to setup an au ID to restore or save data using au Smart Pass servers.
• If you use a microSD memory card to restore data, save the data from your previous au phone to a microSD memory card.
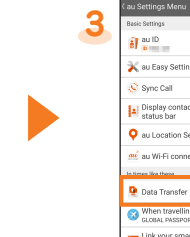

■ How to restore data from the au Settings menu

1 On the Home screen, [基本機能 (Basic functions)] → [Settings]
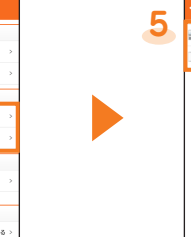

2 [au Settings Menu]

3 [Data Transfer]
* If the terms of use appears, check the content and follow the onscreen instructions.

4 Select a method for returning data
* You need to setup an au ID to restore data using [auスマートパスから戻す (Restore data from au Smart Pass servers)] (data backed up on au Smart Pass servers).

5 If you selected [SDカードから復元する (Restore data from SD card)], select your previous au phone model
* This screen is not displayed if you selected [auスマートパスのサーバから戻す (Restore data from au Smart Pass servers)] on the restore data method screen.
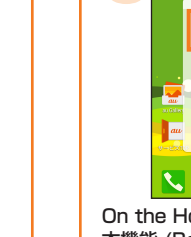

When [SDカードから復元する (Restore data from SD card)] is selected

6 Place checkmarks on the data you want to restore → [戻す (Restore)]→[完了 (Done)]
* This screen is displayed if you selected [スマートフォンのデータを変更す (Restore smartphone data)].
* When a confirmation screen appears, follow the onscreen instructions.
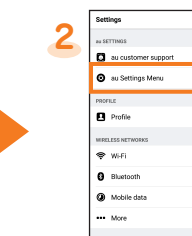

**When [auスマートパスのサーバから戻す (Restore data from au Smart Pass servers)] is selected**

6 Place checkmarks on the data you want to restore → [戻す (Restore)]→[完了 (Done)]
* When a confirmation screen appears, follow the onscreen instructions.

■ Saving data from au Settings Menu

1 On the Home screen, [基本機能 (Basic functions)] → [Settings]

2 [au Settings Menu]

3 [Data Transfer]
* If the terms of use appears, check the content and follow the onscreen instructions.

4 Select a saving location
* You need to setup an au ID to save data from [auスマートパスのサーバに預ける (Save data to au Smart Pass server)] (saving data to au Smart Pass servers).

When [SDカードに保存する (Saving to SD card)] is selected

5 Place checkmarks on the data to be saved, [預ける (Save)] → [完了 (Done)]

When [auスマートパスのサーバに預ける (Save data to au Smart Pass server)] is selected

5 Place checkmarks on the data to be saved, [預ける (Save)] → confirm the details, follow the instructions on the screen → [完了 (Done)]
* When a confirmation screen appears, follow the onscreen instructions.

If you want to use the "Data backup" application to automatically save your photos and contacts to the au Smart Pass server, you can set it up by following the procedure below.

On the Home screen → [基本機能 (Basic functions)] → [Settings] → [au Settings Menu] → [Data Transfer] → place checkmarks on the data to be saved

---

## Reducing Battery Consumption

■ Using Battery Saver

Set up to switch to Battery Saver Mode automatically when the battery is running low.

1 On the Home screen, [基本機能 (Basic functions)] → [Settings]

2 [Battery & power saving]

3 [⬤] on "Battery saver"
* Confirm the status such battery etc. on "BATTERY INFORMATION".

■ Setting Battery saver on timing

1 On the Home screen, [基本機能 (Basic functions)] → [Settings]

2 [Battery & power saving]

3 [Battery saver]

4 [Turn Battery saver on]

5 Tap timing
