au Initial Settings

By setting au ID, you can use various services provided by au such as "au Kantan Kessai" which allows you to purchase apps from the auスマートパス (au Smart Pass) or Google Play. Main setting items are as follows.

If you skip the operation of "au Initial Setting" at the time of purchase, you can set au ID later. In that case, operate from the home screen → [基本機能 (Basic Function)] → [Settings] → [au Settings] → [au Settings Menu] → [au Initial Setting].

- *1 If you registered au ID in the past, step 3 and 4 are not displayed. Go to step 5
- *2 The security code is a four-digit number written at subscription.
- *3 A confirmation screen for requesting access permission will be displayed several times. In this case, do the same as step 7.
- *4 When "Select apps" is displayed on "Backed up" field, tap to check the app *5 If you stored your data to au server using "Data Storage App" tap "Restore from backup now" to restore the data
- *6 Confirmation screens will be displayed several times, follow the on-screen instructions

au Basic Home Notification Settings

Set to display notifications (badges) of missed calls, new mails, etc. on the icons of apps on au Basic Home.

Settings

When the screen for the display method of the badge is displayed, confirm the message and tap "ALLOW". Follow the on-screen instruction and tap [GO TO SETTINGS] \rightarrow [\bigcirc] \rightarrow [ALLOW].

if you skip the operation above, you can set it later. In that case, operate from the home screen → [基本機能 (Basic Function)] → [Settings] → [Apps & notifications] → [Special app access] → [Notification access].

To use au-mail, subscription to LTE NET is required.

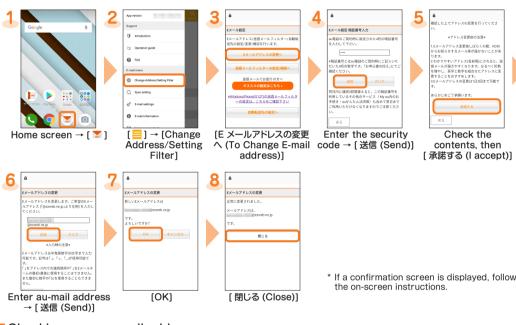

If you did not subscribe it when you purchased the product, contact an au shop or Customer Service Center Your au-mail address is determined automatically after initial setting. You can change the au-mail address later. * Operations and screens are subject to change without notice.

■ Initial Settings * You cannot make initial settings in Wi-Fi® communication.

next.

Changing your au-mail address

the on-screen instructions.

Checking your au-mail address

You can also check your au-mail address in "Profile". Operate from the home screen → [基本機能 (Basic Function)] → [Settings] → [Profile]

Making a Call

Setting Wi-Fi

Use your home Wireless LAN (Wi-Fi®) or public wireless LAN to connect to the Internet. Main settings are as follows.

WPS system Use for registration of access point compatible with Wi-Fi Protected Setup™ with WPS mark.

If you turn on wireless LAN (Wi-Fi®) function, battery consumption increases. You are recommended to turn wireless LAN (Wi-Fi®) function to OFF when not using wireless LAN (Wi-Fi®) function.

機能 (Basic Function)] [Settings] →

[Network & Internet] Using WPS system access point

[Wi-Fi preferences]

[WPS Push Button] / [WPS Pin Entry]

For using WPS button, tap "WPS Push Button" and then keep pressing WPS button of access point to set to WPS mode. An access point is automatically detected and registration starts. For entering WPS PIN, tap "WPS Pin Entry" and enter displayed PIN code for access point, then registration starts.

Viewing/Playing Data

By transferring data from the previously used au phone to a microSD™ memory card, you can insert the microSD memory card into this product and view/play* still image or movie data using "File Commander" in the product. When you activate for the first time, the Terms and Conditions appears. Follow the on-screen instructions.

Home screen → [基本機能 (Basic Function)] → [File Commander] → [CONTINUE] → (CONTINUE WITH ADS1

Tap a category to be displayed → Tap a file Tap data Data is viewed/played

Copyrighted data on the previously used au phone cannot be transferred to the product. However, some Chaku Uta Full®, Video Clip, Chaku Uta Full Plus® may be able to be transferred and played on the product with the same phone number by backing up with

Transferring data from au Settings Menu

Restore/back up data from/to your previously used au phone to/from this product using a microSD memory card or the au server.

- To restore data using the au server, store the data from the old au phone to the au server beforehand. Setting au ID is required for using the au server (If the old au phone does not have au Settings Menu, use auCloud app).
 For restoring data using microSD memory card, save the data to the microSD memory card using the old au phone in advance (If the old au phone does not have au Settings Menu, use au backup app).

Using "Data Storage App"

To use "Data Storage App" to back up photos, contacts. etc. to au server automatically, set as follows.

Home screen → [基本機能 (Basic Function)] → [Settings] → [au Settings] → [au Settings Menu] → [Backup Setting] → Select a data type to back up automatically

according to the guidance on the screen.
