* Unmark items not to use.

9 Tap the link and confirm the content → [I accept]

10 Enter text displayed on screen → [■]

11 Select whether to join Google+
* Here, tap "Not now" and go to next.

---

12 Select whether to make Google Play purchase settings
* Here, tap "SKIP" and go to the next.

13 Check "First", "Last" → [■]

■ STEP 4 : Set up is complete

It is ready to use this product and set up completion screen appears.

1 Set Samsung account as required
* If you do not set, [Skip] → [Skip].

2 Set Dropbox account if necessary
* If you do not set, [Skip].

**3** Change the device name as required → [Finish]

■ STEP 5 : au Easy Setting

You can set au ID, au Wi-Fi SPOT, etc. all at once.
When you have created an au ID, you can use various au services including "au Simple Payment Service" which offers you a simple way to purchase applications from "au Smart Pass" and "Google Play". Create new au ID with this product or use your au ID.
● au ID which is already used by another user cannot be set.
● You can still setup au services after completing initial settings by tapping [⊞]→ [au Easy Setting] on the home screen.

1 [Next]

2 [Register "au ID"] → [Next]

3 [au IDの設定・保存 (Set/save au ID)]

4 Enter a security password → [OK]
* Default value is 4-digit security code written at subscription.

5 Enter a password → [設定 (Set)]

6 Completion screen appears →
[au ID設定メニューへ
(To au ID setting menu)]

7 [終了 (Done)]

8 To update this product, select
"Update" → [Next]
* If you do not want to update this
product, select "Skip update"
and tap "Next" to proceed.

9 Check the terms of service of
the initial settings → Select
"Agree" → [Next]

10 Check the details and [Agree]
* This completes Lookout for au
presetting.
* If you are restoring data
after changing phones, etc.
the "Restoration of backups"
screen appears.
Follow the instructions on the
screen.
* "Restoration of backups"
screen may display on vertical
display.

11 Check the details and [Next]
* If you are changing phones
and app download history
exists, the "アプリの復元 (App
restore)" screen appears.
Follow the instructions on the
screen.

12 Check the applications → [次
へ (Next)] → [Finish]

Mail settings

■ Initial Setup of E-mail

To use E-mail (@ezweb.ne.jp), subscription to LTE NET is required. If you
did not subscribe it when you purchased the product, contact an au shop
or Customer Service Center.
● For model change from au phone, you can continue to use the E-mail
address that is used on the former model by making initial settings.

1 On the home screen, [E-mail]

2 Confirm the contents →
[接続する (Connect)]

3 ● If welcome screen appears,
confirm the content and tap
"Close".

Initial settings are complete,
E-mail address appears →
[閉じる (Close)]

■ Changing your E-mail address

Although E-mail address is automatically decided by performing Initial settings, the E-mail address can be changed.

Checking E-mail address

1 On the home screen, [E-mail]

2 [⋮] → [E-mail settings]

3 [Other settings]

4 Confirm the contents →
[接続する (Connect)]

5 [Eメールアドレスの変更へ
(To Change E-mail address)]

1 In the E-mail settings screen,
[E-mail information]

6 Enter the security code →
[送信 (Send)]

7 Confirm the contents →
[承諾する (Accept)]

8 Enter E-mail address →
[送信 (Send)]

9 [OK]

10 [閉じる (Close)]

2 E-mail address appears

■ Backing up E-mail

E-mails can be backed up to phone memory or microSD memory card. And backup
data can be restored to E-mail application.

1 In the E-mail settings
screen, [Backup/Restore]

2 [Mail Backup] → [OK]
* To backup all e-mails
including e-mail settings,
[Whole Backup].

3 Select character code →
[OK]

4 Mark mail types to back up →
[OK]

● When microSD memory card is inserted to this product, data is backed
up to microSD memory card.

Importing/Exporting contacts

You can transfer contacts data in the previously used au phone to the product via microSD memory card or au Micro IC
Card (LTE).
* Save contacts data to microSD memory card or au Micro IC Card (LTE) from the previously used au phone in advance.

1 In the Apps list, [Contacts]

2 [⋮] → [Settings] →
[Import/Export]

3 [Import from USB storage]/
[Import from SD card]/
[Import from SIM card]

4 [Device]/Synchronized account
* Contacts data is imported. If
there are multiple contacts
data saved, go to Step 5.

5 Select contacts data to
import → [OK]
* To import from au Micro IC
Card (LTE), select contacts
data to import and then tap
"Done".

● To export contacts, in Step 3, tap
"Export to USB storage"/"Export to
SD card"/"Export to SIM card". It is
recommended to export important
data on a regular basis for its
protection.

Backing up to microSD memory card

Using My Files to back up phone data to microSD memory card.
* "Device storage" indicates phone and "SD card" indicates microSD memory card.

■ Example: Backing up data shot by camera

1 On the home screen, [▭]

2 [Device storage] → [DCIM] →
[Camera]

3 [⋮] → [Select] → Tap checkbox
of data to back up

4 [📋]

5 [SD card] → Select a folder to
save in → [Paste here]
* [⋮] → Tap "Create folder"
to create a new folder.

● To bring back backed up data to phone, copy data in the microSD memory card to the original location.
● To restore E-mails, in the E-mail settings screen, [Backup/Restore] → [Restore mails] → Select a mail type to
restore → [OK] → Mark backed up data to restore → [OK] → [Add]/[Overwrite] → [OK].

■ Data saving locations in device

Data type		Data location
Data shot by camera		Device storage > DCIM/Camera
E-mail (@ezweb.ne.jp)	Received mail	Device storage > private/au/email/BU/RE
	Sent mail	Device storage > private/au/email/BU/SE
	Unsent mail	Device storage > private/au/email/BU/DR
	Attached data of received mail is saved	Device storage > private/au/email/MyFolder
	Inserted image of received mail (including D-pictogram) is saved	Device storage > private/au/email/MyFolder
Data such as images saved by Browser		Device storage > Download

Saving battery power

■ Setting saving power mode

Set to switch to saving power mode automatically
when the battery level becomes low.

1 On the home screen, [基本機能
(Basic functions)] → [Settings]
→ [General] → [Power Saving]

2 [Power saving mode] / [Ultra power
saving mode] → Tap " ⭕ " to turn
to " ❙ " → Set each function

● When "Ultra power saving mode" is set,
color of screen is turned to grayscale and
you can only use the applications which
you select as necessary applications.
