Galaxy S9+   SCV39

Setting Guide

Thank you for purchasing the Galaxy S9+ (referred to as the "product" in this manual). In this guide, settings for using the product are described.

You can use the "Online manual" (in Japanese only) which describes explanation of various functions by the following operation.

On the home screen, flick up or flick down → [**Galaxy**] → [取扱説明書 (Online Manual)]

This manual is described with the content of Android 8.0.
For the latest information, please refer to the "設定ガイド (Setting Guide) (Japanese) available on the au homepage. (https://www.au.com/support/service/mobile/guide/manual/ (in Japanese only))
Company names and product names referred to in this manual are trademarks or registered trademarks of respective companies.

Online manual (in Japanese only)

■ Using by this product

1

On the home screen, flick up or flick down

2

[**Galaxy**]

3

[取扱説明書 (Online Manual)]

You can use the online manual.

* If the confirmation screen of how to use is displayed, follow the on-screen instructions.

■ Using by PC, etc.
Refer to au homepage.
https://www.au.com/online-manual/scv39/
(in Japanese only)

■ Downloading instruction manual

From the page of the instruction manual downloading list, search "SCV39" with "model name, model number" and download the instruction manual.
*To display the page of the instruction manual downloading list, search "Instruction manual" on the au homepage (https://www.au.com/english).

Initial settings

The first time the product turns ON, the initial setting screen appears automatically. Follow the guidance to make the settings.
* Depending on the settings, setting contents and displays may differ.

■ STEP START

1

[日本語 (Japanese)] → [English] → [OK] → [⊕]
● To change the language after it has been initially set, on the home screen, flick up or flick down → [設定 (Settings)] → [一般管理 (General management)] → [言語とキーボード (Language and input)] → [言語 (Language)] → [言語を追加 (Add language)] → select language you want to use → [標準に設定(SET AS DEFAULT)].

■ STEP 1: Wireless LAN (Wi-Fi®) function setting

1

Tap Wi-Fi® network to connect
* Tap [NEXT] to set later.

2

Enter a password (security key) → [CONNECT] → [NEXT]

● Password (security key) is set on access point. Check the password in advance.
● If an access point device supports WPS Push button system, in step 1, [ADVANCED] → [WPS push button], and press WPS button on the access point device within 2 minutes to connect Wi-Fi® network.
● If an access point device supports WPS PIN code system, in step 1, [ADVANCED] → [WPS PIN entry], and enter PIN code on the access point device to connect Wi-Fi® network.

■ STEP 2: Check the terms and conditions

4 Enter au-mail address → [**送信 (Send)**]

5 [**OK**] → [**閉じる (Close)**]

How to transfer data from the au Settings Menu

You can restore/store data from your previous au phone to this product using a microSD memory card or au server.
● If you restore data using au server, store the data using your previous au phone to au server in advance. You need to set up an au ID to use the au server.
　(If your previous au phone does not have the au Settings Menu, use the au Cloud app.)
● If you restore data using a microSD memory card, save the data using your previous au phone to a microSD memory card.
　(If your previous au phone does not have the au Settings Menu, use the au backup app.)

**1** On the home screen, flick up or flick down

2 [**Settings**]

3 [**au Settings Menu**]

4 [**Data Transfer**]
* If the confirmation screen is displayed, follow the on-screen instructions.

5 [**機種変更はこちら (Model changing is here)**] and perform data transfer according to the screen guidance.

If you want to store your pictures, address book (contacts), etc. automatically to the au server using "データお預かり(Data Storage)" app, you can set up by following procedure.
● On the home screen, flick up or flick down → [Settings] → [au Settings Menu] → [Backup Setting] → select the type of data to automatically store
