AQUOS sense

SHV40

Setting Guide

Thank you for buying the "AQUOS sense SHV40" (simply called the "product" from here on).
This manual describes the settings and precautions for using the product. For detailed descriptions of various functions, refer to the "Online Manual" (Japanese) available on the au homepage.
* For illustrations and descriptions in this manual, refer to "Basic Manual" available on the au homepage and on the product.
* The company names and product names appearing in this manual are trademarks or registered trademarks of their respective holders.
* Phone illustrations and screen shots are for descriptive purposes only, and may differ from the actual product.

やめましょう、歩きスマホ。

キケン！水ぬれ充電
濡れた状態での充電は、異常な発熱・焼損などの原因となり大変危険です。

When using the product

● The battery is built into the product, and cannot be removed by the customer.
● To force the power off, hold 🔘(⏻) down for 8 or more seconds (Release your finger after the product vibrates to turn the power off).

Basic Operations

For detailed operations, refer to the "Online Manual" (Japanese) available on the au homepage.
● When the display language is Japanese, on the home screen → "App list screen" → [サポート] (Support) → [取扱説明書] (Instruction Manual) (Japanese).
You can switch the display language for function names and other items to English.
● On the home screen → "App list screen" → [設定] (Settings) → [言語と入力] (Languages & input) → [言語] (Languages) → [言語を追加] (Add a language) → [English] → Long touch "English (United States)" and drag it to the top of the list.

Turning the Screen On

Lift the product and keep it stationary to turn the screen on when the screen is turned off (Turn screen on by holding).
* This function is enabled when you purchase the product.
In the following cases etc., the screen may not be turned on.
● When you are moving with the product held (while walking, driving a car, etc.)
● When you keep the product moving before or after lifting it
● When you lift the product vertically or horizontally

① Display
Touch it directly with your fingers to operate.

Tap/Double tap
Tap: Gently touch the screen and then immediately release your finger.
Double tap: Tap the same position twice.

Long touch
Keep touching an item etc. with your finger.

Slide/Swipe/Drag
While your finger is gently touching the screen, an item, etc., trace it to the desired direction or position.

Flick
Touch the screen and then quickly move (flick) your finger up, down, right or left.

Pinch
Touch the screen with two fingers and widen (pinch-out) or narrow (pinch-in) the fingers' distance.

② ◁ (Back key): Tap it to return to the previous screen.
③ ◯ (Home key): Tap it to display the home screen.
④ ▢ (Recent Apps key): Tap it to display Recent Apps screen.
⑤ 🔘(⏻)(Power key): Hold it down to turn the power on. Hold it down while the power is turned on → [Power off] to turn it off.

Unlocking the screen
Unlock the screen by swiping "🔒" up.
● If a password, etc. is set for the screen lock, it is displayed as "🔒".

■ Character Input Method
* Following operation explanations use "Japanese S-Shoin". On the character entry screen, [⌨] → [Japanese S-Shoin].
You can enter characters by flick input or tapping keys repeatedly. Tap " あA1 " to switch the input modes.

Flick input
By touching a key, the candidates that can be entered by flick input are displayed as shown on the right. By flicking the key in the direction of a desired character being displayed, the character is entered in the character entry area.

《Character entry screen (Japanese S-Shoin)》

■ App Permissions Settings
When you activate applications/functions to access to the function or information of the product for the first time, the confirmation screen for requesting the permission of access authority is displayed. When the confirmation screen is displayed, check the displayed contents carefully and follow the one-screen instructions.
● The explanation screen for permissions may be displayed depending on the applications/functions. Also, multiple confirmation screens may be displayed or the displayed contents may differ. Check the displayed contents carefully and follow the on-screen instructions.
If you deny the permission, the application/function may not be activated or the use of function may be restricted.
● In this manual, some description of the confirmation screens may be omitted.

1

Tap "Menu" during a call.

2

[Hold].

3

The call is put on hold and the guidance is played for the other party.

4

Tap "📞" to return to the call.

How to Transfer Data with the au Settings Menu

You can return/store data from an old au phone to this product using a microSD™ memory card or au server. To protect important data, be sure to save (back up) data periodically to a microSD™ memory card or au server.
● To return data using an au server, store data from the old au phone to the au server beforehand. To use the au server, you must set an au ID. (If the old au phone does not have au Settings Menu, use au Cloud application.)
● To return data using a microSD™ memory card, save the data from the old au phone to the microSD™ memory card beforehand. (If the old au phone does not have au Settings Menu, use the au backup application.)

1

On the home screen, swipe/flick bottom of screen up to display the App list screen → [Settings].

2

[au Settings Menu].

3

[Data Transfer].*

4

Select "機種変更はこちら" (If you have changed a model) and transfer data by following on-screen guidances.

* If a confirmation screen is displayed for terms of use/privacy policy, follow the on-screen guidances.

Automatically Storing Photos, Address Book etc.

Use the following steps to set automatic backup of photos, address book entries etc. to the au server using the "Data Storage" application. Photos can only be automatically stored with a Wi-Fi® connection.
● On the home screen, swipe/flick bottom of screen up to display the App list screen → [Settings] → [au Settings Menu] → [Backup Setting] → Select the type of data to store automatically.

Viewing/Playing data

You can view/play data on the product by the following operations.
● On the home screen, swipe/flick bottom of screen up to display the App list screen → [Settings] → [Storage] → select the save destination (Internal shared storage/SD card/USB memory name)* → select the category and folder → select the data to display.
* If the microSD™ memory card or USB memory is not inserted to the product, contents of the Internal shared storage are displayed.

Reducing Battery Consumption

You can access "function buttons" from the status panel to enable/disable functions and modify their settings. You can reduce the battery consumption by switching their setting frequently, such as when not using the functions. Enabled functions are displayed in white.
● You can also reduce the battery consumption using "Energy saving". For details, refer to the "Online Manual" (Japanese) available on the au homepage.

1

Slide the status bar down with your two fingers.

2

Tap the functions whose setting you want to switch by using "function buttons".*

* Flick the function buttons field to the left or right to switch pages.

Brighten the screen/Increase the light duration of the backlight

When the screen is dark/the backlight is quickly turned off, change the setting.

1

On the home screen, swipe/flick bottom of screen up to display the App list screen → [Settings].

2

[Display].

3 Brighten the screen

[Brightness level] → Slide the bar to the left or right and set the brightness* → [OK].

Increase the light duration of the backlight

[Sleep] → Select time.

* You can set whether to automatically adjust the screen brightness according to the ambient brightness by switching "Automatic brightness" to be enabled/disabled.
