Basic operation

For detailed descriptions of operations, refer to the "Instruction Manual" (Japanese) application installed on the product or "取扱説明書 (詳細版) (Full Instruction Manual)" (Japanese) available on the au homepage.

Status bar
Current status and notification icons are displayed.

Application key
The Applications screen appears.

Display (Touch panel)
Operate directly touching with your finger.

Power key
Power ON
Press and hold for over a second.
Screen Lock
Press while the screen displayed, then the backlight turns off and screen lock is activated (avoiding the keys or touch screen from false operations).
Unlocking Screen Lock
The lock screen appears when turning the power on or the backlight on by pressing . Swipe (flick) the screen up or down to cancel the screen lock.

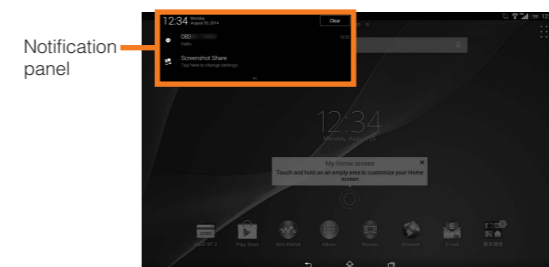

Recently used applications
Display a list of recently used applications by a thumbnail or small apps. Tap [Close all] to end all applications and delete all list items in the thumbnail.

Home key
Display the Home screen.

Back key
Return to the previous screen.

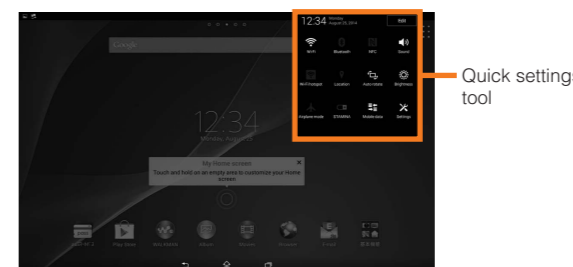

Opening Notification panel

If any notification icons are displayed on the left side of the status bar, slide down the left side of the status bar to open the Notification panel. You can check details of notification icons or start corresponding applications.

Opening Quick settings tool

Slide the right side of the status bar downward to open Quick settings tool so that you can set to ON/OFF of the function etc.

Character entry

Use software keyboard to enter characters.

The software keyboard appears when you tap the entry field for registering a contact, composing a mail, etc.

Software keyboard

-  Confirm contents → Select "Agree" → [Next] → [Agree] on the confirmation screen
* If there is data to be recovered, a recovery screen for data appears. Follow the onscreen instructions.
* If you select "Disagree" → [Next] → [OK] on the caution, go to the step 12.

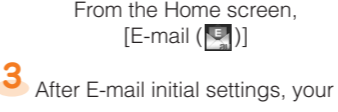

-  Mark the data to be backed up automatically → [Next]
-  Select "Activate 3LM" or "Skip Activation" → [Next]
* If you select "Activate 3LM", you can set support service in case of loss, theft or malfunction of the product.
* If you select "Skip Activation", go to the step 12.

-  Confirm the contents → [Activate]
-  Mark applications to install on the recommended apps screen → [Next] → [Finish]
* If there are applications to be recovered, a recovery screen for applications appears. Follow the onscreen instructions.

E-mail setting

To use E-mail (@ezweb.ne.jp), subscription to LTE NET is required. If you did not subscribe it when you purchased the product, contact an au shop or Customer Service Center. This is a service with which you can send/receive mails using E-mail (@ezweb.ne.jp). Your E-mail address is determined automatically when initial settings are done. You can change the E-mail address later.
* For model change from au phone, E-mail address used on the previous model can be used continuously after initial settings.

Initial settings

-  From the Home screen, [E-mail (✉)]
-  Check the contents → [接続する (Connect)]
- After E-mail initial settings, your E-mail address appears.

Checking E-mail address

- From the Home screen, [E-mail (✉)] → [☰] → [E-mail settings]
- [E-mail information] → Check your E-mail address

Changing E-mail address

- From the Home screen, [E-mail (✉)] → [☰] → [E-mail settings]
- [Other settings] → Confirm the content → [接続する (Connect)]
- [Eメールアドレスの変更へ (To change E-mail address)]
- Enter the security code → [送信 (Send)] → Check the contents → [承諾する (I agree)]
- Enter E-mail address → [送信 (Send)] → [OK]

Backing up Email

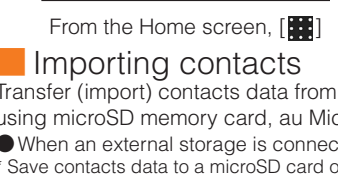

- From the Home screen, [E-mail (✉)] → [☰] → [E-mail settings]
- [Backup/Restore] → [Mail Backup] → [OK]
- Select character code for backup data → [OK]
* For character code, tap [Help] to check.
- Mark to back up mails → [OK]
● Mail data is saved in the internal storage (/storage/emulated/0/private/au/email/BU).
If a microSD memory card is attached, data is saved in the microSD card (/storage/sdcard1/private/au/email/BU).
● To back up mail data or mail settings (notification settings, filtering settings etc.) all at once, back up from "Whole Backup".

PC-mail

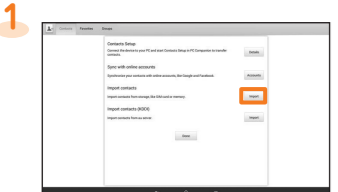

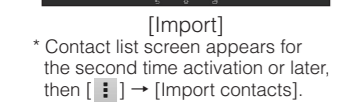

You can use mail addresses except for E-mail (@ezweb.ne.jp). You need to set up a PC-mail account to use PC-mail. For the first time use, make settings as follows.
From the Home screen, tap [☰] → [Email (✉)] → Enter Email address and password → [Next] → [Next] → Enter account name and display name → [Next]
* For details, refer to the "Instruction Manual" (Japanese) application installed on the product or "取扱説明書 (詳細版) (Full Instruction Manual)" (Japanese) available on the au homepage.

Importing/exporting/sending contacts

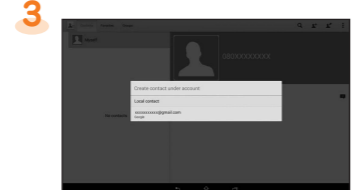

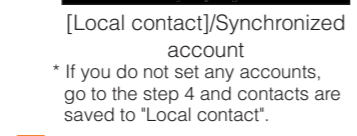

Activating contacts application

-  From the Home screen, [☰]
-  [Contacts]

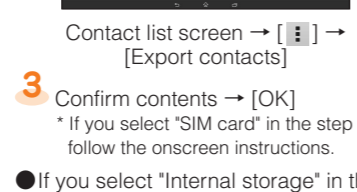

Importing contacts
Transfer (import) contacts data from your previous au phone to this product using microSD memory card, au Micro IC Card (LTE), etc.
● When an external storage is connected, you can import from "USB storage".
* Save contacts data to a microSD card or au Micro IC Card (LTE) in advance.

-  [Import]
-  Select data location

* Contact list screen appears for the second time activation or later, then [☰] → [Import contacts].

-  [Local contact]/Synchronized account
* If you do not set any accounts, go to the step 4 and contacts are saved to "Local contact".
-  Select a vCard file → [OK]
* If you select "SIM card" in the step 2 and select contacts, import starts.

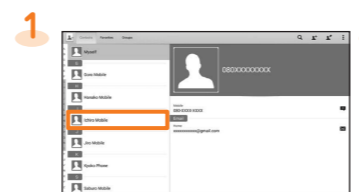

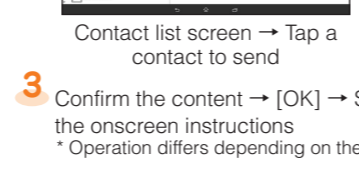

Exporting contacts
Save (export) contacts etc. regularly to microSD memory card etc. to secure your data.

-  Contact list screen → [☰] → [Export contacts]
-  Select a location to export
- Confirm contents → [OK]
* If you select "SIM card" in the step 2, select contacts and tap "Export" and then follow the onscreen instructions.
● If you select "Internal storage" in the step 2, data is saved in "/storage/emulated/0/System/PIM/", if you select "SD card", data is saved in "/storage/sdcard1/System/PIM/".

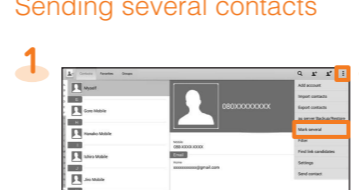

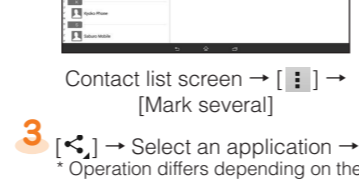

Sending contacts

You can send contacts to another device.

Sending one contact

-  Contact list screen → Tap a contact to send
-  [☰] → [Send contact]
- Confirm the content → [OK] → Select how to send a contact → Follow the onscreen instructions
* Operation differs depending on the application you selected.

Sending several contacts

-  Contact list screen → [☰] → [Mark several]
-  Mark contacts to send
- [☰] → Select an application → Follow the onscreen instructions
* Operation differs depending on the application you selected.

Backing up to microSD memory card

Use the "File Commander" application to back up data saved in the product to a microSD memory card.

-  From the Home screen, [☰]
-  [File Commander]
* If a screen appears to register a mail address etc., follow the onscreen instructions.
-  Mark files → [☰] → [Mark]
-  [SD card] from the item list
-  [☰] → [Paste] on the desired location
* You can create a new folder by tapping [☰] → [Folder].

● When recovering backed up data, files in the microSD memory card are copied to original locations. To recover email, use an email application to restore backup.

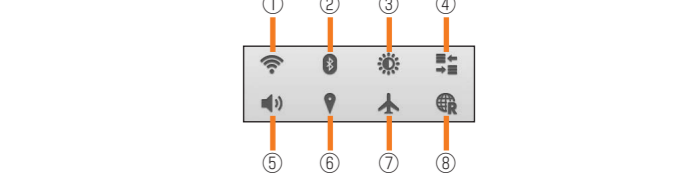

Saving battery power

Use Quick settings widget to set Wi-Fi® function, Bluetooth® function, backlight, mobile data communication, etc. Switching the settings frequently can reduce the battery power consumption.

Adding Quick settings widget

-  Long-touch an area of the Home screen where no icons are displayed → [Widgets]
-  [Tools] → [Quick settings]

Quick settings widget

- Wi-Fi: Wi-Fi® function On/Off
- Bluetooth: Bluetooth® function On/Off
- Backlight: Switch backlight brightness
- Data communication: Mobile data communication On/Off
- Sound: Silent mode (Vibrate/Mute) On/Off
- Location: Location On/Off
- Airplane mode: Airplane mode On/Off
- Roaming: Data roaming On/Off
