- Do not allow a part of your body such as finger or conductive foreign object external connection terminal. Doing so might cause a malfunction.

PIN code

a

To prevent unauthorized use of the au Nano IC Card 04 by a third party, you can set the product to require PIN code entry every time the power is turned on. You also need to enter PIN code when setting whether the PIN code entry is

If the PIN code is incorrectly entered three times consecutively the PIN code will be locked. You can unlock the PIN code using PUK code.

Entering PIN code is not required by default state. In "Set up SIM card lock",

- nowever, you can change the setting requiring to enter PIN code. . Note that setting up SIM card lock requires entry of PIN code.
- When an entry of security code is required for making settings, change the initial value of the security code to your own number and then use it.
 PIN code is set to "1234" by default state. In "Change SIM PIN", however, you
- can change the PIN code to any four- to eight-digit number as necessary. PIN code is not reset even if you execute "Factory data reset

■ PUK code

- In case the PIN code is locked, you can unlock it by entering the PUK code. PUK code is an eight-digit number given at the time of purchase, and is printed on the back side of the plastic card on which your au Nano IC Card 04 is attached.
- After entering the PUK code, you need to set a new PIN code . If the PUK code is incorrectly entered ten times consecutively, contact an au shop, PiPit or Customer Service Center

3. If you are unclear on any points or are troubled by anything, contact an au

shop or Customer Service Center.

The connections between the product and all other Bluetooth® and wireless LAN (Wi-Fi®) devices have not been confirmed. Therefore, connections with all Bluetooth® and wireless LAN (Wi-Fi®) devices are not guaranteed.

This product supports security features for wireless communication compliant with the Bluetooth® and wireless LAN (Wi-Fi®) standard.

I AN (Wi-Fi®) at your decision and responsibility.

Bluetooth® function: 2.4FH4/XX8

■ Wireless I AN (Wi-Fi®) function: 2 4DS/OF4

of mobile unit identification devices can be avoided.

Available channels differ depending on the country For use in an airplane, check with the airline company in advance.

specifications, but the security may not be sufficient depending on the

usage environment and configuration. Be careful when making data communication using Bluetooth® or wireless LAN (Wi-Fi®) function.

Wireless LAN (Wi-Fi[®]) has the advantage that it can be freely connected anywhere within the radio wave range, as it uses radio waves for exchanging information. At the same time, there is a risk that a malicious third party may

obtain unauthorized access if security settings have not been configured

You are recommended to configure security settings before using wireless

The Company assumes no responsibility for leakage of data or information that may occur during Bluetooth®wireless LAN (Wi-Fi®) communication. Since Bluetooth® and wireless LAN (Wi-Fi®) functions use the same

frequency band, using the both functions at the same may cause radio wave

from the network. If connection fails, stop using either of the Bluetooth® and

oth® and wireless LAN (Wi-Fi®) functions of the product use frequencies

nterference resulting in decreased communication speed or disconnection

umid or dusty places. Doing so might cause a malfunction.

The product has a waterproof property equivalent to JIS waterproof grade (JIS C 0920) IPX5 1 and IPX6 2 , as well as a dustproof property equivalent to JIS dustproof grade IP6X*3 on the condition that the cover of the microSD memory card/au Nano IC Card 04 slot is securely attached (based on in-house testing Before using the product, thoroughly read "Important items to remember before use" to ensure correct use. Failure to follow the contents described in the sections might cause intrusion of water, sand or other foreign material, resulting in overheating, ignition, electric shock, injury or a malfunction.

- 1 IPX5 equivalent means that the product will maintain its operability as a phone even if it is sprayed with water from a 6.3 mm diameter nozzle at a istance of about 3 meters for more than 3 minutes at a rate of about 12.5 liters per minute from any direction.

 *2 IPX8 equivalent means that the product will maintain its operability as a
- phone with no water getting inside the main unit even if it is gently ubmerged in a tank of still tap water at room temperature to a depth of 1.5 neter for about 30 minutes.
- *3 IP6X equivalent means that the product will securely maintain its function of no grit and dust getting inside the main unit even after it has been placed i an apparatus with grit and dust of diameters of 75 µm or less and shaken for 8 hours.

nce operation of the product on each usage scene was confirmed based on the above assumption, proper operation of the product in every possible condition during actual use is not guaranteed. Malfunctions determined to be caused by mishandling by the customer are not covered by the warranty.

Important items to remember before use

- Make sure that the cover of the microSD memory card/au Nano IC Card 04 slot is firmly closed. Waterproofness/dustproofness is only effective when the cover is securely closed. Do not open or close the cover of the microSD memory card/au Nano IC

(The internal battery of the product is a lithium-ion

battery)
The internal battery is not fully charged at the time of purchase. Charge the internal battery before using the

Li-ion 00 product. Charge the internal battery if you have not used the product for a long time.

- Use in very hot or cold environments, for example, when left in an tomobile with the windows closed in summer, will cause the internal battery capacity to drop and shorten the available usage time. This will also shorten the internal battery's service life. Try to use the product as far as
- The internal battery gradually discharges after charging even if the product is not used. The internal battery might discharge completely after long time
- The internal battery is a consumable part. If the performance of a battery does not recover (e.g., the usable time after each charge has become extremely short) the hattery is at the end of service life, so ston use Battery is built into the product. For repair, the product must be collected to au shop etc. and charges will be incurred. And you might not use the product during certain period of time. Please be forewarned. Note that the length of service life varies depending on the usage condition, etc.
- The internal battery sometimes swell up as they approach the end of the service life. This is due to the properties of lithium-ion batteries, and is not a problem in terms of safety.

- Do not wrap the cable of the specified charging equipment (sold separately) around the adapter itself. Do not bend the joint of the plug or connector and the cable of the charging equipment forcibly. Do not place such as pulling. Doing so might cause a malfunction.
- When unplugging the plug of the specified charging equipment (sold separately) from the outlet or cigarette lighter socket, hold and pull the power plug. If you pull the cable, the cable might be damaged.

■ Precautions on charging The supplied and optional accessories are not waterproof/dustproof. Check the

25

following before and after charging. Never charge the battery if the product is wet. Doing so might cause fire,

- burns, injury, electric shock, etc. Check that the product is not wet. If you are charging the battery just after
- a clean dry cloth. Do not touch the specified charging equipment (sold separately) with wet hands. Doing so might cause electric shock
- Do not splash water over the specified charging equipment (sold separately) when using them. Do not use them near water such as in a bathroom, shower room, kitchen or washroom. Doing so might cause fire, burns, electric shock, or malfunction. Do not bring them into a bathroom, etc. ever if you do not charge the product with them. Doing so might cause fire, burns electric shock or a malfunction.

■ Draining water when the product gets wet Drain the following parts:
