More	For more advanced settings

Setting Wi-Fi®

Use your home Wireless LAN (Wi-Fi®) or public wireless LAN to connect to the Internet. Main settings are as follows.

Wi-Fi easy settings	Answer to the questions on the screen or follow the instructions to register an access point easily.
WPS system	Use for registration of access point compatible with Wi-Fi Protected Setup™ with WPS mark.

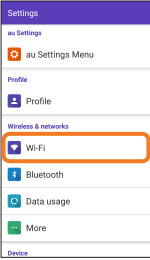

* If you turn on wireless LAN (Wi-Fi®) function, battery consumption increases. You are recommended to turn wireless LAN (Wi-Fi®) function to OFF when not using wireless LAN (Wi-Fi®) function.

1

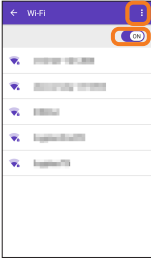

Apps menu → [Settings] → [More]

2

[Wi-Fi]

3

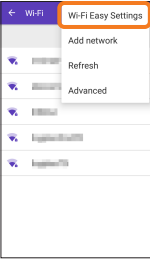

Turn "ON" and [MENU]

Available Wi-Fi® networks are listed. Select a Wi-Fi® network to connect → Enter a password as required → [CONNECT] to connect the Wi-Fi® network.
If a Wi-Fi® network you want to connect cannot be detected, operate from [MENU] → [Add network] and connect the Wi-Fi® network manually.

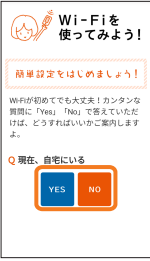

Using Wi-Fi Easy Settings

4

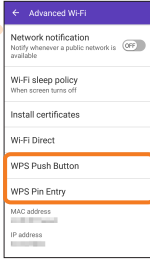

[Wi-Fi Easy Settings]

5

Answer the questions on the screen and follow the instructions to register an access point.

4

[Advanced] → [WPS Push Button] / [WPS PIN Entry]

5

For using WPS button, tap "WPS Push Button" and then keep pressing WPS button of access point to set to WPS mode. An access point is automatically detected and registration starts.
For entering WPS PIN, tap "WPS PIN Entry" and enter displayed PIN code for access point, then registration starts.

Viewing/Playing data

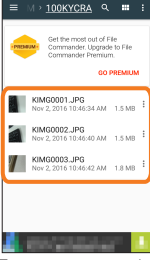

By transferring data from the previously used au phone to au a microSD™ memory card, you can insert the microSD memory card into this product and view/play still image or movie data using "File Commander" in the product. When you activate for the first time, the Terms and Conditions appears. Follow the on-screen instructions.

1

Apps menu → [Tools] → [File Commander]

2

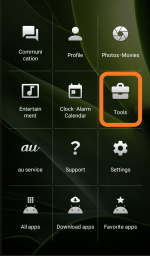

Tap a category to be displayed → Tap a file → Tap data
Data is played.

* Copyrighted data on the previously used au phone cannot be transferred to the product. However, some Chaku Uta Full®, Video Clip, Chaku Uta Full Plus® may be able to be transferred and played on the product with the same phone number by backing up with LISMO Port Ver 4.2 or later.

Infrared communication

Use infrared communication to send/receive profile or various data between the product and other devices.

1

Apps menu → [Tools] → [Infrared]

2

Select an item to operate

3

To receive data, select "Infrared" and point the infrared data port of the product to the infrared data port of the other device.
To send, select "Send profile"/"Send contacts"/"Send file", select data to send for sending contacts/file → [OK], and then point the infrared data port of the product to the infrared data port of the other device.
* For sending data from File Commander, tapping "OK" operation is not needed.
• When authentication code entry screen appears, enter authentication code (four-digit number) → [OK].

Transferring data from au Settings Menu

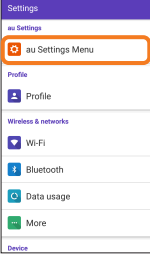

Restore/back up data from/to your previously used au phone to/from this product using microSD card or the au Smart Pass server.

1

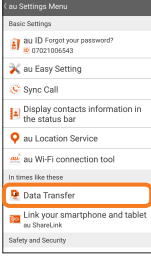

Apps menu → [Settings] → [More]

2

[au Settings Menu]

3

[Data Transfer]

- Setting au ID is required for restoring/backing up data using au Smart Pass server
- For restoring data using microSD memory card, save the data to the microSD memory card using your previously used au phone in advance.
